

# Optimize Data Infrastructure with Fabric in 30

Streamline workflows and integrate advanced analytics across your organization by leveraging Long View's expertise for a seamless Microsoft Fabric deployment.

## Modernize Your Data Platform

Long View's focused process delivers strategic enhancements to your data platform, enabling smoother operations and advanced analytics. Over the course of just 30 business days, we guide your organization through these three (3) essential stages:

### GOVERNANCE & SECURITY ENHANCEMENT

- **Enhance Data Privacy & Security**

Strengthen your data privacy protocols and security measures to ensure AI-readiness and compliance.

### DEPLOYMENT & WORKFLOW OPTIMIZATION

- **Implement Fabric Environments**

Set up and tailor Power BI and/or Fabric environments to align with your development processes.

- **Streamline Dataflows**

Improve the collection, processing, and storage of data within the OneLake environment using Power BI Dataflows.

- **Strengthen Access Controls**

Deploy advanced archiving solutions and establish role-based access controls with comprehensive reporting.

### INNOVATION & AI EMPOWERMENT

- **Unify Multi-Cloud Resources**

Integrate multi-cloud and on-premises resources into a streamlined, cohesive ecosystem.

- **Leverage Available Assets**

Manage and utilize a range of configured assets, including dashboards, reports, and data models.

- **Adopt AI & DataOps Best Practices**

Equip your organization with AI knowledge and DataOps methodologies to drive smarter decisions.
