

Utilize Intelligent Security Analytics with **Sentinel** in 30

Modernize your security operations (SecOps) with the next-gen security tool, Microsoft Sentinel, bolstered by Long View's top-tier expertise to fortify your defenses against modern threats.

Your Path to **Modern Security Operations**

Long View's thorough validation, seamless integration, and expert guidance empowers you to optimize your security strategy and enhance threat detection and response capabilities.

Our six (6) week program delivers the following milestones:

SECOPS ARCHITECTURE

- **Craft a Streamlined Data Flow**
Develop a data flow and architecture tailored for your SecOps, ensuring efficient and secure operations.
- **Pilot Microsoft Sentinel**
Deploy Microsoft Sentinel in a pilot program to assess its capability within your infrastructure and to obtain practical intelligence.

DEPLOYMENT & INTEGRATION

- **Deploy Sentinel Syslog Collector**
Integrate a Sentinel Syslog Collector to enhance data aggregation, providing a more complete picture of your security landscape.
- **Boost SOC Efficiency**
Increase the efficiency of your Security Operations Center (SOC) through Data Collection Health Monitoring and optimization.

VALIDATION & ENABLEMENT

- **Validate Data Collection Types**
Conduct thorough validation and testing of each data collection type to ensure accuracy in threat detection.
- **Attend In-Depth Workshops**
Participate in up to two (2) workshops, two (2)-hours in length, focused on training and knowledge transfer to empower your team.
- **Gather Deployment Recommendations**
Benefit from tailored tips for further deployment or migration, optimizing your security posture for future challenges.
