LONG VIEW

NextGen Ops:
Future Proof IT Investments

Utilize Infrastructure as Code (IaC) in Azure Cloud to manage and scale IT infrastructure efficiently, securely, and consistently with Long View's NextGen Ops service.

Increase Your Speed of Business Through Digital Transformation

Long View's NextGen Ops Azure helps your business to automate its approach to managing and securely scaling IT infrastructure through our five (5) milestone approach:

SETUP

- **Establish Subscriptions**
  Determine and configure the appropriate Azure subscriptions required for your NextGen Ops setup.
- **Deploy Azure Foundations**
  Implement standardized Azure Foundation templates to streamline operations across your entire IT landscape.

STAGE

- **Setup Release Management Zones**
  Create controlled environments for staged updates to carefully test and validate before full-scale release.
- **Establish Security**
  Implement a Zero Trust security framework to minimize vulnerabilities across cloud operations.

INTEGRATE

- **Onboard Liaison**
  Include a client liaison for continuous support and effective communication.
- **Conduct Value Stream Discovery**
  Map out your value streams—services, applications, and infrastructure—for operational agility.

DEPLOY

- **Transform Strategic Plans**
  Convert strategic visions into actionable designs that can be readily implemented.
- **Establish Release Management Process**
  Standardize practices and ensure smooth deployments with a robust management process.

EXCEL

- **Gain 24/7/365 Support**
  Access round-the-clock assistance ensuring stability and quick resolution of issues.
- **Leverage CIO Advisory**
  Participate in quarterly CIO advisory program for regular reviews to continually enhance operations.

Move Your Business Forward with Enhanced IT Management

Our approach focuses on managing automation code, not the infrastructure itself. Rather than simply lifting and shifting to the cloud, we transform systems to Azure Native, empowering your organization to:

Save Costs

Actively align and scale infrastructure to achieve cost savings of up to 30%.

Eliminate Drift

Apply release management strategies to ensure code remains true to its initial design and purpose.

Cut Technical Debt

Move towards a future with nearly zero technical debt and minimal outage windows.

Sustain Resilience

Maintain agility, responsiveness, and security amid market changes with CIO advisory.
