
Teams Amplify Prerequisites

The following configurations must be in place to qualify for this engagement. This engagement is designed for organizations that have already deployed Microsoft Teams but are looking to drive further adoption and confirmation of current configuration. Long View Systems can support clients achieve the prerequisites for an additional fee.

- Have configured the user accounts in M365 including AD Connect and have base security and identity configured.
- Have configured Outlook online and have either fully supported Outlook hybrid (Outlook 2016 with CU 8) or fully migrated to Outlook Online.
- (Optional but preferred) Have deployed subscription version of Office App (Outlook, Word, PowerPoint, Excel and OneNote). The newest version of Outlook is required to leverage some Teams meeting features.
- Have deployed Microsoft Teams desktop application to target devices.
- Have enabled the Teams features in M365 for employees and assigned Teams licenses.
- Have migrated Skype accounts to M365 Teams.
- Have assigned all users in either Islands or Teams Only mode.
- (Optional but preferred) Mobile: Have deployed the mobile Teams app and Outlook mobile apps to organization managed devices and/or have a BYOD policy.
