

Minimize Cloud Risks and Threats with **Managed Extended Detection and Response (XDR Shield)**

Leverage Microsoft's Azure Sentinel SIEM & XDR technology combined with Long View's 24x7 Security Operations Center (SOC) to secure your Microsoft Cloud environment.

Protect Your Modern Workplace with Long View

In just four (4) weeks, Long View ensures that your modern workplace is protected with a fully integrated solution, *XDR Shield*, through four (4) key milestones:

SOLUTION DEPLOYMENT

- **Professional Set Up**
Set up Microsoft Sentinel in your Azure workspace.
- **Playbook Deployment**
Deploy expert playbooks, modifying them for new threats.

THREAT TRIAGE

- **Immediate Notification**
Notify administrators of threats and recommended actions.
- **Threat Triage**
Triage threats with our skilled SOC team through Azure Lighthouse.

DOCUMENTATION AND REPORTING

- **Security Documentation**
Develop a Security Escalation Document and maintain detailed incident records tailored to your organization's best practices.
- **Monthly Security Insights**
Access monthly reports summarizing security incidents, responses, and continuous improvement recommendations.

COMPREHENSIVE MONITORING

- **Monitoring Tools**
Monitor security scope through Azure Active Directory logs, Microsoft 365 logging, and Threat Intelligence Indicators.
- **Proactive Vulnerability Scanning**
Regularly scan the environment to identify and respond to vulnerabilities before they can be exploited.

Move Your Business Forward with a **Tailored Cloud Security Strategy**

Enhance your cloud security posture and resilience across your Microsoft Cloud (Microsoft 365, OneDrive, Teams, Azure, Microsoft 365 Defender, Dynamics 365), including response automation from Microsoft Defender P2 enabled security products. In just four (4) weeks, Long View's experts empower your organization with:

Real-Time Threat Response

Counter phishing, ransomware, and viruses using advanced machine learning and a skilled SOC team for mitigation.

Continuous SOC Monitoring

Benefit from 24x7 monitoring and a threat response system that automatically notifies system administrators and triggers playbooks.

Comprehensive Incident Management

Ensure thorough incident management with extensive documentation and reporting of all security actions.

Custom Security Escalation

Leverage the Security Escalation Document to direct and execute organization-specific responses to security threats.
