

# Longbow

FROM DATA TO DONE

Your cloud security platforms offer you more comprehensive detection than ever before, yet despite continuous access to real-time alerts, your security teams struggle to assess risk and provide the most effective remediation action.

The problem isn't a lack of data, but a lack of context across your cloud environment and tools, each new alert moving them further away from the job they were hired to do: keeping your organization secure.

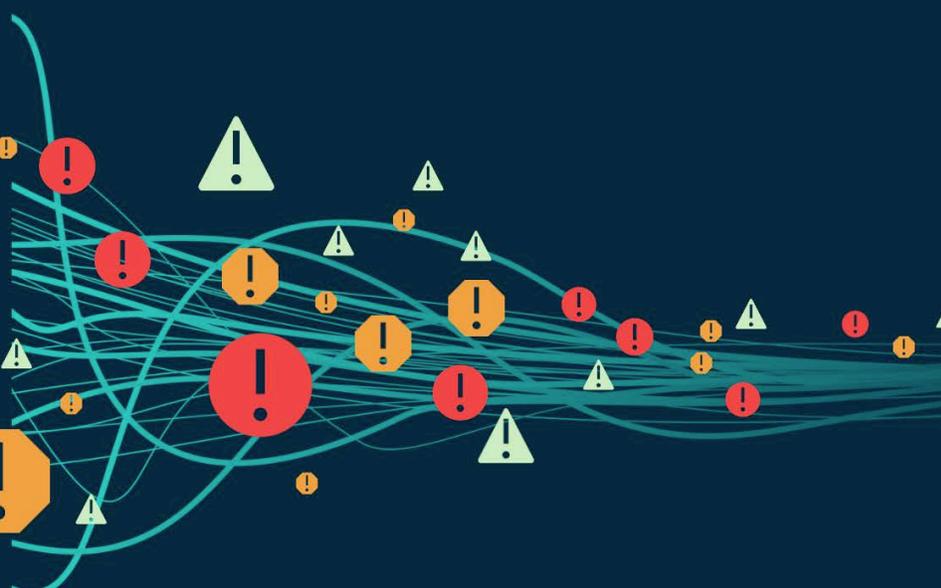

Longbow closes the gap between cloud security alerts and the Best Next Actions to reduce the most risk with the least effort by analyzing issues across cloud native and 3rd party tools, identifying root-cause, enriching issues with critical context, and prioritizing issues based on urgency to enable enterprises to continuously measure risk across applications and identify the Best Next Actions.

Longbow helps your team answer the critical question in the noisy cloud environment "What's the Best Next Action we should take to reduce our risk posture?"

---

***"Longbow automates the investigation of cloud findings from Prisma, to enable us to quickly get to the next best actions to keep our cloud assets secure. Longbow also helps us understand risks with our Cloud SSO users, providing visibility we can't get anywhere else."***

# Longbow

reduces your time to remediate risk by over

# 75%

## Before: Cloud Risk Reduction Workflow

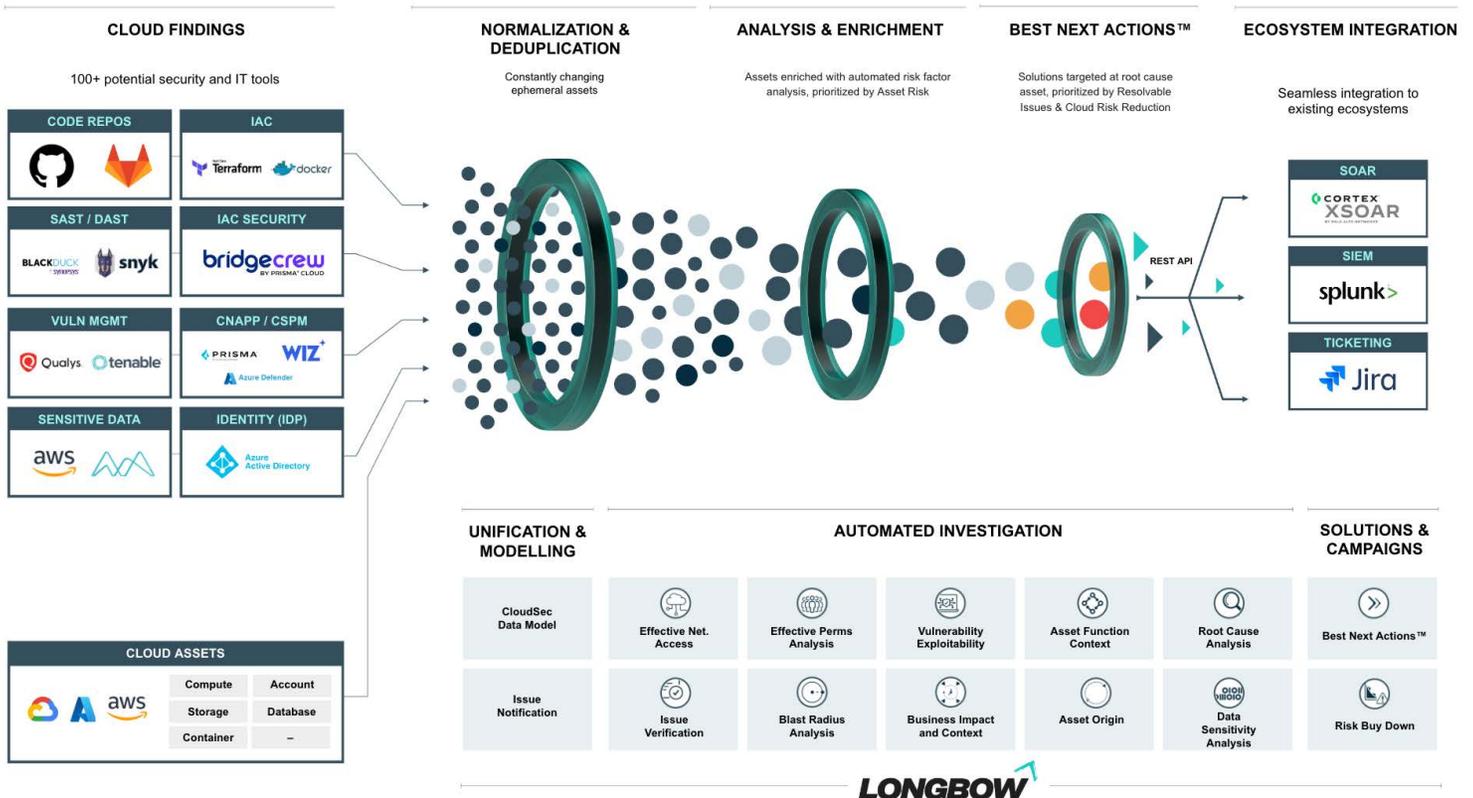

Today's issue investigation is still very manual because the steps are difficult to automate resulting in a growing backlog of unresolved issues

## After: Cloud Risk Reduction Workflow

Longbow enables security analysts to automate the most important and tedious parts of their workflow

# LONGBOW SOLUTION OVERVIEW

## INVESTIGATE

- Unify issues across tools
- Identify root-cause of issues
- Analyze and enrich issues with critical context

## ILLUMINATE

- Prioritize issues based on Urgency context
- Continuously measure asset risk

## ELEVATE

- Identify Best Next Actions reducing the most risk at the source
- Hunt for risk across your cloud
- Create campaigns to track risk buy down progress

Longbow closes the gap between Alerts and Action, analyzing cross-tool context and providing the Best Next Actions to reduce the most risk with the least effort.
