

## PRODUCT BRIEF

PRODUCT NAME: LBN Learning Management Portal

I. Overview: Our learning management portal is a comprehensive and user-friendly platform designed to facilitate online learning through video resources. This innovative solution is ideal for educational institutions, training centers, businesses, and organizations that want to provide engaging video content along with assessments to measure knowledge gain. This platform simplifies video content creation, administration, assessment, and analytics, making it an effective tool for educators and trainers.

### II. Key Features:

**Video Learning Library:** Easily upload and organize video resources, categorizing content by subjects, courses, or topics.

**Interactive Assessments:** Create quizzes and tests related to video content to measure knowledge retention and comprehension.

**Knowledge Gain Tracking:** Monitor individual and group knowledge gain over time to assess the effectiveness of video resources.

**User-Friendly Interface:** An intuitive platform for both educators and learners to access and engage with video content and assessments.

**Custom Content Creation:** Easily build video content with tools for recording, editing, and adding quizzes within the platform.

**Comprehensive Analytics:** Access detailed insights into video views, quiz performance, and knowledge gain across users and content.

**Progress Tracking:** Monitor individual progress and completion rates for courses and video content.

**User and Role Management:** Define user roles and access levels, allowing administrators, instructors, and students to access the platform as needed.

**Mobile Accessibility:** Accessible on mobile devices, enabling students to learn and take assessments from anywhere.

**Certifications and Badges:** Reward learners with digital certifications or badges upon successful completion of video content and assessments.

III. Target Audience: Our Online Video Learning Management Application serves a wide range of organizations, including:

**Educational Institutions:** Schools, colleges, and universities

**Corporate Training:** Companies looking to provide engaging video content and measure employee knowledge gain.

**Training Centers:** Organizations providing courses and certifications with video-based learning resources.

**Content Creators:** Individuals or entities creating educational video content for diverse audiences.

### IV. Benefits:

**Enhanced Learning Experience:** Provide engaging video resources along with assessments for a more interactive and effective learning experience.

**Knowledge Assessment:** Measure knowledge retention and comprehension through assessments directly related to video content.

**Data-Driven Improvement:** Leverage analytics to improve video content and assess the effectiveness of educational materials.

Scalable Learning: Offer a flexible platform that can be tailored to different educational and training needs.

V. Security and Privacy: Data security and privacy are top priorities. The application ensures encryption, secure login, and compliance with data protection regulations to protect user data.

VI. Future Enhancements: Future updates may include expanded support for live streaming, AI-driven recommendations, integration with learning management systems, and enhanced assessment features.

VII. Licensing Model: Our application is available through a subscription-based licensing model, providing flexibility and scalability for different organizations.

VIII. Conclusion: Our Online Video Learning Management Application with Knowledge Testing is a robust tool for organizations looking to provide video-based learning resources and assess knowledge gain effectively. By offering advanced features, interactive assessments, and comprehensive analytics, we aim to empower educators, trainers, and content creators to deliver engaging and impactful online learning experiences.
