Your AI-Powered Digital Workforce, Delivered as a Cloud Service

memmoo is a cloud-native automation platform for building and deploying digital coworkers tailored to your workflows — not generic chatbots, but intelligent agents with reasoning, memory, and skills. memmoo acts as the cognitive layer that connects AI digital co-workers across every business function — self-healing, self-directing, and self-reporting.

AI Coworkers

Deploy intelligent agents with reasoning, memory, and custom skills that execute real business processes autonomously.

Workflow Builder

Design process automations with approvals, audit trails, and human-in-the-loop governance for every workflow.

Secure Multi-Tenant Cloud

Isolated, autoscaling execution on memmoo's Azure-secured cloud. Your data stays inside your own tenant boundary.

100+ Integrations

Connect to NetSuite, Shopify, Zendesk, Slack, S3, APIs, and custom data sources seamlessly.

Deployment model

memmoo runs as a cloud service (SaaS) on every plan. Private cloud and on-premises / on-device deployment are available exclusively on Enterprise.

Human-in-Command Philosophy

Every AI action is observable, governable, and auditable. You stay in control — always.

Pre-Built for Every Department

Deploy in days, not months. Customize to your unique workflows.

Human Resources

HR Helpdesk

Automates routine HR queries and workflows so your team can focus on people.

Human Resources

Employee Onboarding

Fast, compliant, and engaging day-one experience — fully automated.

Customer Services

AI Customer Support

Instant 24/7 support that delights customers and empowers your team.

Human Resources

AI Hiring Assistant

Accelerates hiring workflows to help you secure top talent first.

Finance

Invoice Mate

Automates invoice processing from email intake to CRM updates.

Legal

Contract Buddy

Tracks contracts, sends approval emails, and creates renewal tickets.

Sales

QBR Buddy

Auto-generates Quarterly Business Reports from Salesforce data.

IT Operations

Meeting Scheduler

Automates scheduling, reminders, and meeting summary generation.

Administrative

QuickRead Inbox

Reads, summarizes, and notifies you about important emails.

Need a custom coworker? Build one in days with our Workflow Builder.

From Concept to Deployment in Days, Not Months

01

Discover

Identify the most intensive manual touchpoints in your organization. Our experts map workflows that benefit most from AI automation.

02

Design

Select from pre-built coworker blueprints or design custom workflows using our visual Workflow Builder with approval chains.

03

Connect

Integrate with your existing tools — NetSuite, Shopify, Zendesk, Slack, S3, email, APIs, and 100+ data sources.

04

Deploy

Go live on memmoo's secure cloud with isolated, autoscaling execution — your first coworker in as little as 72 hours. Enterprise customers can choose private cloud or on-premises instead.

05

Optimize

Monitor performance with dashboards, logs, and analytics. Continuously improve with human-in-the-loop governance.

...and 100+ more integrations

The Competitive Edge

Privacy-First Architecture

Your data stays inside your own isolated tenant and is never used to train shared models, with controls mapped to GDPR and other regulatory frameworks.

Rapid Deployment

Go from concept to production in days. Pre-built blueprints and a visual workflow builder accelerate time-to-value.

Human-in-Command

Every AI decision is observable and auditable. Approval chains, governance controls, and full audit trails.

Scalable Operations

Start with one coworker, scale to entire departments. Isolated autoscaling handles demand spikes seamlessly.

Deployment Flexibility

Cloud (SaaS) on every plan. Enterprise adds private cloud and on-premises deployment with data residency controls.

Cost Optimization

Reduce operational costs by up to 70%. Eliminate manual data entry, routing, and repetitive task overhead.

Automation Across Industries

Supply Chain & Logistics

- Automated carrier scorecard reporting
- Extract shipment details from email bodies
- Enrich shipment data with country codes
- Order routing across warehouses and 3PLs
- Inventory reconciliation across systems

Reduce freight processing time by 60%

Finance & Accounting

- GL mapping with automated validation
- Invoice processing from email to CRM
- Create dashboards with automated refreshes
- Consolidated inventory reporting
- Expense report creation and approvals

Cut month-end close cycle by 40%

Customer Experience

- Zendesk ticket parsing and categorization
- AI-powered 24/7 customer support
- Multi-language support in 10+ languages
- Real-time translation with cultural context
- Automated escalation and routing

Achieve 3x faster first response time

Human Resources

- Automated employee onboarding workflows
- AI hiring assistant for talent acquisition
- HR helpdesk for routine query automation
- Contract tracking and renewal management
- Meeting scheduling and coordination

Save 20+ hours per week on HR tasks

Every workflow can become a coworker. Start with templates, customize endlessly.

PRICING

Plans That Scale With Your Business

memmoo

List pricing as published on Microsoft Marketplace. All plans delivered as a cloud service.

POPULAR		
Growth \$2,500 /month \$30,000 billed annually A custom fleet that hands off to each other - Up to 3 custom-built AI co-workers - Co-worker-to-co-worker handoff and orchestration - Up to 20 users 25,000 workflow actions / mo 50,000 AI credits / mo - Core apps + custom integrations - Self-reporting dashboards & briefing - Guided build (2–3 weeks) - Priority support DEPLOYMENT memmoo Cloud (SaaS)	Transform \$5,000 /month \$60,000 billed annually Multi-site, multi-function - Up to 10 custom AI co-workers - Up to 50 users 100,000 workflow actions / mo 200,000 AI credits / mo - Custom integrations + API access - Cross-department orchestration - Advanced audit trails & scheduling - Dedicated build pod - Priority support + quarterly review DEPLOYMENT memmoo Cloud (SaaS)	Enterprise Custom The full fleet, governed - Unlimited AI co-workers - Unlimited users - Pooled, custom action & credit volume - memmoo Super Agent — full Ring 3 orchestration - SSO/SAML, data residency, security policies - Solution architect + custom SLA - Dedicated customer success manager DEPLOYMENT Cloud, private cloud, or on-premises / on-device

On-premises and private cloud deployment are available on the Enterprise plan only.

Growth and Transform run on memmoo's secure, tenant-isolated cloud. All plans are billed annually in USD.

Prices as listed on Microsoft Marketplace. Custom terms and volume pricing available for Enterprise.

Enterprise-Grade Security, Built Into Every Layer

Isolated tenants, complete auditability, and deployment options that match your compliance needs.

DATA PRIVACY

Tenant-Isolated by Default

Every customer runs in a logically isolated tenant on memmoo's Azure-secured cloud. Your data is never shared with other customers and never used to train shared models.

ACCESS CONTROL

Role-Based Governance

Fine-grained permissions, approval chains, and human-in-the-loop governance. Every AI action requires appropriate authorization levels.

AUDIT & COMPLIANCE

Full Audit Trails

Every AI decision, input, and action is logged immutably with full lineage — who asked, what the agent did, what data it touched, and who approved. Export auditor-ready evidence in minutes, not weeks, for GDPR, FADP, SOC 2, and your industry's frameworks.

DEPLOYMENT CHOICE

Cloud by Default, On-Prem on Enterprise

Cloud (SaaS) is the standard deployment for all plans. Enterprise adds private cloud and on-premises / on-device options with data residency controls.

Built on Microsoft Azure · Encrypted in Transit & At Rest

"memmoo empowered us to maintain 24/7 operations without increasing headcount, while significantly reducing conflicts and processing time."

— Head of Audit, Financial Services Company
