

Maximize performance of your LS Central system

with the help of LS Retail Consulting experts

If you're an LS Central user and need help improving your performance on Microsoft Dynamics 365 Business Central, LS Retail Consulting can help. Our detailed and structured performance tuning processes will help you fine-tune system speed, responsiveness, and user experience.

Using the MARK™ approach, our consulting team will help you:

Measure. Document process timing and set up continuous monitoring to establish a performance baseline.

Ascertain. Conduct root cause analysis to identify performance bottlenecks.

Revise. Implement changes and optimizations based on findings.

Keep Going. Continuously monitor, refine, and repeat until performance meets expectations.

Let our experts assist you by:

- Identifying business processes
- Assessing execution times with telemetry
- Reviewing AL code
- Gathering volumetric data
- Proposing optimizations
- Executing implementation
- ...and more
