

Let's Solve

Point to Point(P2P) migration & App Modernization Factory

March 2022

A Larsen & Toubro
Group Company

Business Need

WHY

- As on premises SharePoint platforms go beyond their extended support date with Microsoft, it has sparked an urgency for organizations to act NOW to migrate & modernize their SharePoint on premise applications
- No single suite of product or framework in the market which can cater to both content Migration and Modernization
- Lack of Tools, libraries , Reusable Components & framework for accelerating the migration & modernization process
- Lack of Governance, Best practices & Templates

P2P Migration & App Modernization Factory

WHAT

A **Migration App factory** to cater to all migration & modernization needs by providing suitable Tools & accelerators

Faster Go to market with accelerated migration to cloud

Enhanced user experience with modern UI components built on Fluent UI

Adoption of Low-Code/No-Code Solutions along with a comprehensive Governance framework significantly **easing the operations**

Vision : A One-Stop-Shop solution for content Migration and Modernization of the Legacy workload to M365 with a fast-track implementation.

LTI's Solution Overview

P2P migration & App Modernization Factory

with its collection of proven migration processes, Tools/Accelerators, Templates & Best Practices will enable the migration & transformation journey right from assessment, planning, implementing to deploying, operating & managing.

Solution Constructs

Planning & Assessment Tools, Templates & Framework

Starter Projects & Reusable Component Library

Templates & Best Practices & well-defined Governance process

Tools & Scripts for Migration, Validation & Data fixing

Ready to use Power Platform Solutions

Features

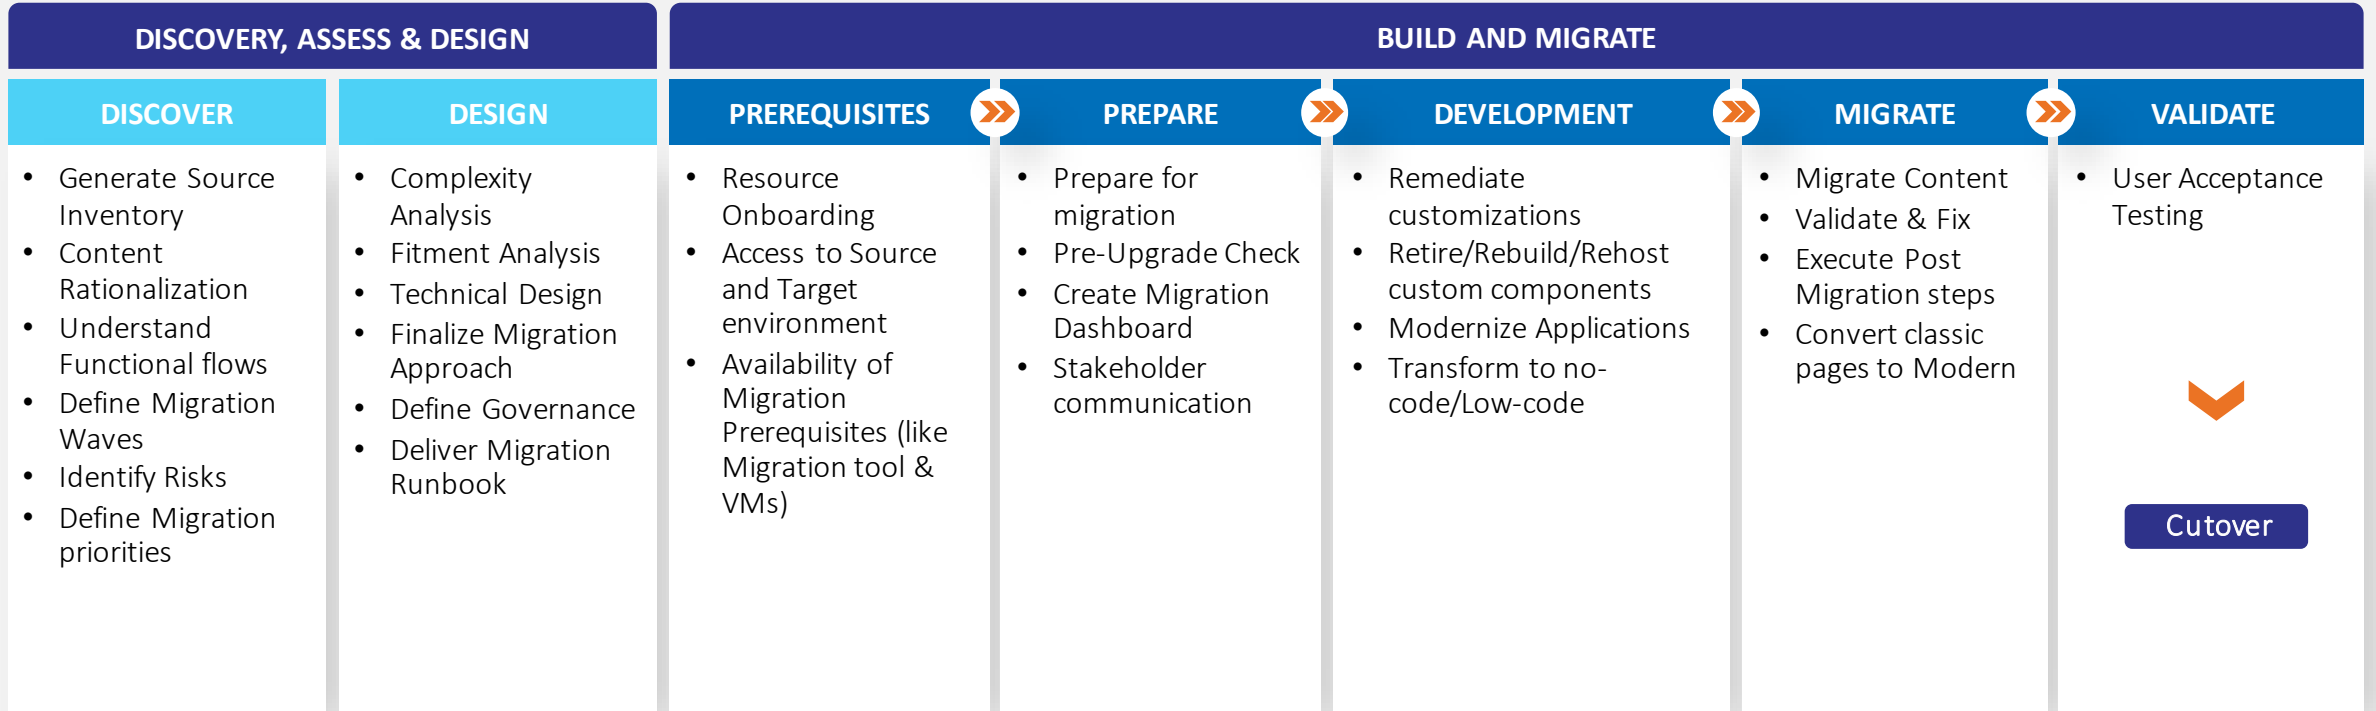

- Supports migration from SharePoint On-Prem(2007/2010/2013/2016/2019) to SharePoint Online Migration
- Supports migration from SharePoint On-Prem(2007/2010/2013/2016) to SharePoint 2019
- Supports migration from Lotus Notes & Documentum to SharePoint 2019 & SharePoint Online
- Proven assessment methodology along with its accelerators to access current state, identify gaps, understand the transformation requirements & challenges and produce a high-level roadmap of migration & App Modernization journey

Tools & Templates

- P2P Analyzer
- Notes2Net Analyzer & Migrator
- Documentum to SharePoint Migrator
- SQL to SharePoint Migrator
- InfoPath Remediator
- SPFX Component Library
- Pre/Post Migration Checklists
- Governance & Communication Templates
- iBOT
- Power Platform ready-to-deploy applications like:
 - ❑ Contract Management
 - ❑ Loan Eligibility
 - ❑ RPA using Power Automate

Execution Approach

P2P migration & App Modernization Factory Tools & Accelerators

Proven Methodology

'Day1' Readiness

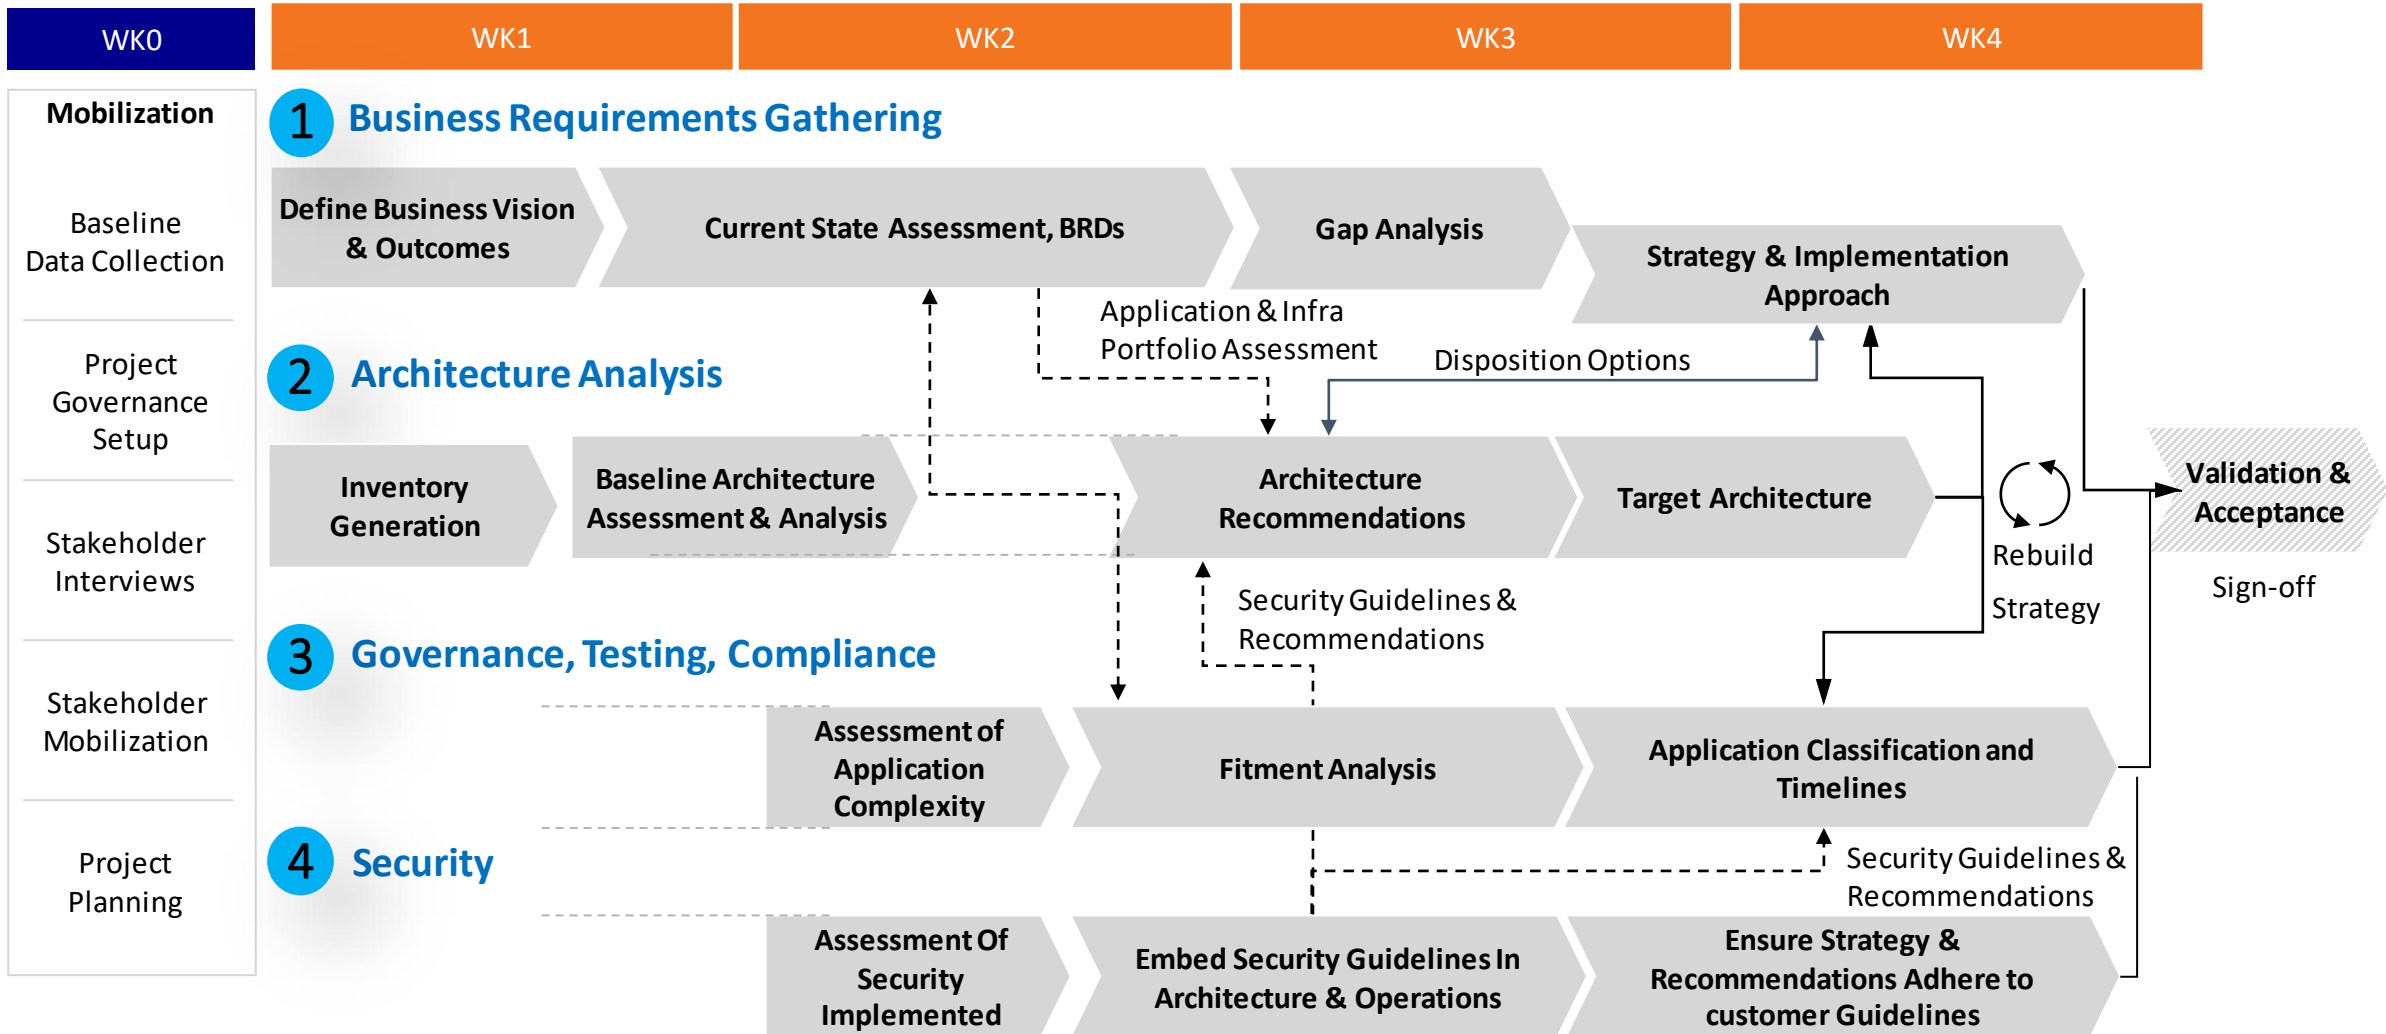

LTI Solution Accelerators

Comprehensive Testing and Validation

Readiness for User Adoption

Discovery & Assessment Phase

P2P migration & App Modernization Factory will start with a 4-week assessment phase, to understand and analyze the current environment and produce the Runbook, acting as a guide to the Migration & Modernization journey

Customer Benefits

~30%

Effort reduction for
Analysis activity

~30%

Effort reduction in
Development &
Modernization activities

~20%

Effort Reduction for Post
& Pre-Migration
activities

~40%

Effort reduction if ready-
to-deploy Power
platform solutions
leveraged

Improved tracking and
reporting with Migration
Dashboards for
Management, IT SME's
& Business users

Improved governance &
Best practices with pre-
defined templates

* % Reduction will depend on the complexity of the farm and number of solution artifacts leveraged as a part of solution

Cost Savings

- Pre-Built Tools & Accelerators automate most of the development, validation and deployment activities, hence reducing efforts & Cost
- Reusable component framework and ready to use Low-code/No-code solution resulting into faster go-to-market with very minimal customizations

Process

- Well-documented migration process, templates and Best Practices make sure that the overall Technical and Operational Governance is followed
- Well defined checklists make sure that the overall migration is performed without any glitches
- Creation of Migration dashboards to be reviewed regularly both internally for the team and for external stakeholders

Modernization

- Conversion of legacy application to Modern UI with improved usability and catering to different screen sizes
- Ready-to-Use Power Platform solutions with minimal client specific customizations
- Leverage Fluent UI component & solutions to make user experience is more intuitive
