T-spin Hop on to the Azure cloud

10.09.2024

Primary Challenge in Banking Industry: Security & High-Availability

For financial institutions embracing cloud transformation, a crucial hurdle is ensuring a platform that offers top-notch availability, security, and cost-effective infrastructure.

CHALLENGES

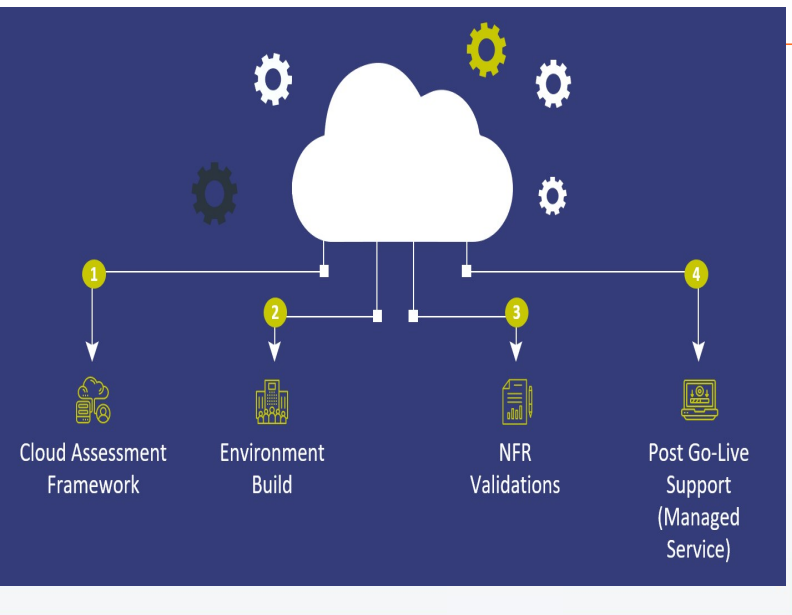

The challenges faced by the banking industry when moving to the cloud include data security, regulatory compliance, legacy system integration, and vendor selection.

IDEAL SOLUTION

Ideal Solutions for banking industry moving to the cloud: strong security, regulatory compliance, smooth integration and careful vendor selection based on expertise.

DESIRED OUTCOMES

T-Spin Hop on to the Cloud offers a much-needed solution for addressing these challenges by facilitating a seamless transition to the cloud, leveraging LTIM framework.

T-Spin Hop on to the Azure Cloud

To aid banks adopting Temenos or migrating on-premises stacks to Azure, LTIM created a framework "T-spin Hop on to the Azure cloud". It consists of a four-step process:

1. Cloud Assessment Framework
2. Environment Build
3. NFR Validations
4. Post Go-Live support (Managed Service)

1

Banking made agile on Azure.

Agile banking transformation on Azure - Empowering financial institutions.

2

LTIM's "T-spin" Azure Cloud Simplified.

Seamless cloud adoption & migration to Azure, LTIM's T-spin simplifies transformation.

3

"T-spin" Simplifying Temenos migration.

Simplify Temenos migration with T-spin - Seamless banking transformation.

LTIMindtree “T-Spin Hop on to the Azure Cloud” on Microsoft Azure

T-Spin, powered by Microsoft unleash seamless banking transformation, solving challenges with unmatched efficiency.
