

LTIM OD@Azure offerings

Advisory & Planning

- Analysis of on-premises inventory and creation of OD@A BOM
- Strategy for database deployment and consolidation
- Solutioning for Maximum Availability RAC for Oracle Database on Azure
- Planning for Oracle Database migration

OD@A Efficiency Blueprint

- Deployment plan for Oracle DB licenses on Azure
- Optimal utilization of MACC- $\$$ for Oracle DB BOM
- Construct for OD@A private offer
- Automated factory-model approach for Oracle DB migrations to OD@A

Optimizing Performance

- Deploy elastic resource scaling to align with workload demands
- Skilled performance tuning experts for managing database performance.
- Ensure optimal network config by using Azure's high-speed interconnects.
- Leverage OEM & Azure Monitor to continuously observe DB performance.

Multi Layered Security for OD@A

- Protection of Oracle DB from vulnerabilities
- Database encryption
- Audit Vault and DB firewall
- Data redaction solutions
- Database Vault
- Data masking
- Implemented DB security solutions to meet GDPR, POPI, HIPAA etc.

Hyperautomation for OD@A

- Automated oracle patching
- Automated cloning of non-production environments
- Automate AKS (Azure Kubernetes services) using Autonomous DB
- Implement RAG connection for Open AI based automation

Data Insight & Analytics

- Enterprise data warehouses (Exadata or not)
- Custom applications built on an Oracle Database
- Goldengate pipelines and Oracle Database operational datastores
- Oracle Business Intelligence deployments

Innovation & AMS

Accelerated migration driven by Canvas platform

Cloud Strategy & Roadmap

INFINITY Star

Repository of Industry specific roadmaps

INFINITY Business

Template business case with options, TCO and ROI

INFINITY Insights

Infra assessment of on-prem application portfolio for cloud readiness.

INFINITY AppLens

Application Assessment for cloud strategy and modernization

Cloud Migration & Transformation

Retain

Re Host

Re Platform

Re Factor

Re Architect

Re Imagine

Retire

INFINITY Express

Automated multi-cloud infrastructure provisioning and management

INFINITY DevOps

Self-service DevOps platform for automated enablement & persona-based governance

INFINITY JCAT

Interactive Architecting Tool with Auto Provisioning for Legacy Oracle ERPs

INFINITY Recon

Automated reconfiguration tool post Cloud Installation

INFINITY Validate

Tool set to compare and validate post migration Application Configurations

INFINITY DataMight

Migration engine with Specific Templates to migrate Oracle Applications

Cloud Ops. & Governance

INFINITY Ensure

Autonomous cloud governance and FinOps platform built to manage multi-cloud environments

INFINITY Botzer

Enterprise Chatbot platform providing automated conversational workflows

INFINITY Watch

Unified solution for application monitoring with Command Centre and cognitive insights

INFINITY.MOD

Empowering Enterprises to modernize their Applications to Accelerate Business Outcome

LTIM Free Consulting for OD@Azure

Dedicated 2-hour Session with our Experts

To Identify the Best-fit for your Business

Discussion On:

- *Process for migrating Oracle on-premises databases to OD@Azure*
- *Process for addressing needs like migrating database to an Oracle Engineered platform*
- *How do we ensure seamless migration with minimal downtime*
- *How have we assisted clients to migrate their database to Exadata Cloud*
- *How do we use pre-migration validation to identify and fix issues.*
- *Beyond migrating oracle DB to Azure - by leveraging Azure solutions like purview, AVS etc.*

Benefits:

- *Details on benefits of migrating Oracle on-premises databases to Azure*
- *Have experts address your migration questions*
- *Create strategies for high availability, reliable backups, and disaster recovery plan*
- *Methods for recognising and addressing the migration issues*
- *Use an automated approach for smooth migration with minimal downtime*
