# Power BI Governator

Power BI, Microsoft's number one reporting solution, keeps on growing and so does its community and user base.
Attaining a structured Power BI environment which can cope with this rapid growth is quite the task without having the right tools at your disposal.

With the **Power BI Governator**, this will turn a once hard and tedious task into a walk in the park!

Benefits

Combined Sources

In our solution we have combined multiple data sources into one solution.
From Microsoft Graph API to Power BI API, we've got it all!

User Governance

How many Pro licenses do we have?
Are all of them being actively used?

…
With the Power BI Governator the answer is just one click away!

Power BI & Office 365 Landscape

An easy way to have an integrated, structured view at objects and to manage access control within your environment!

Activity Tracking

Clear look at which activities were performed at what time.
Also wondering which users were involved?
No problem!
