Madison AI

AI assistants for government leaders to save 5 hours a week on tasks they do every day.

Governance | Planning | Grants | HR | Purchasing

What are we solving for with GenAI?

Reducing the Administrative Burden.

Agencies are buried in common, repetitive AND necessary tasks to run government effectively. Think staff reports, Board briefings, policy analysis, etc.

Loss of Institutional Knowledge.

Wave of retirements and volume of open positions is creating a huge loss of organizational knowledge.

Need for More Capacity to Meet Service Demands.

Empowering staff to do more with the capabilities and resources you have. AI is a force multiplier to help make this a reality.

Madison AI

Internal, custom LLMs for local governments to reduce the administrative burden.
