Microsoft Intune Migration Services

A streamlined path to secure, cloud-based device management

M3 Technology Consultants (M3TC) delivers a structured Microsoft Intune migration service designed to modernize endpoint management, strengthen security, and simplify device administration with minimal disruption to end users. This service enables organizations to transition from legacy or unmanaged environments to Microsoft Intune (Endpoint Manager) using Microsoft Entra ID (Azure AD) and Microsoft 365 security capabilities.

Overview

M3TC's Intune Migration service provides end-to-end planning, configuration, testing, and deployment of Microsoft Intune for user and device management. The engagement focuses on improving security posture, increasing control over corporate devices, enabling secure access to data without reliance on VPNs, and reducing administrative overhead through automation and centralized policy enforcement.

What our customers are saying

"The team did a great job planning and executing the project plan. Our client was very happy with the results and how professional and timely the M3TC team was when they communicated updates or scheduled actions."

Why Choose M3TC?

Expertise

M3TC brings proven expertise with successful migrations tailored to each client's unique needs, ensuring a smooth and effective transition.

Service

Customers benefit from personalized service delivered by dedicated project managers and engineers who guide each step.

Cost Transparency

With cost transparency, clients enjoy clear billing, flexible payment options, and no extra support fees.

Scale

M3TC's future-proof technology provides scalable solutions that adapt to evolving business requirements.

Our Process

M3 Technology Consultants delivers Intune migrations using a structured, phased approach designed to minimize disruption and accelerate adoption. Services include:

Assessment & Readiness:

Audit users and devices, validate requirements, and identify critical systems.

Configuration:

Assign licenses and configure Microsoft Entra ID, security, compliance, and encryption policies.

Intune Setup & Testing:

Configure Intune policies, enroll test users, and refine settings prior to production rollout.

Deployment:

Enroll devices, enforce policies, and verify secure access and user experience.

Project Management:

Provide planning, coordination, and stakeholder communication throughout the engagement.

Our Migration is Ideal For:

- Organizations adopting Microsoft Intune for the first time.
- Businesses replacing legacy device management or ad-hoc security controls.
- Companies seeking stronger endpoint security and compliance.
- Distributed or remote workforces requiring secure, cloud-based access.
