

M3 Technology Consultants

Microsoft SharePoint Online Migration

Modernize file storage and collaboration with a secure, low disruption move to SharePoint Online.

M3 Technology Consultants (M3TC) provides structured Microsoft SharePoint Online migration services that help organizations modernize document management, improve security, and reduce reliance on legacy file infrastructure. M3TC specializes in planning, configuring, and migrating organizational content into SharePoint Online using a phased, low disruption approach aligned with Microsoft 365 best practices.

Our Proven Migration Approach

M3TC delivers end-to-end SharePoint Online engagements designed to centralize files, enable secure collaboration, and simplify access for onsite and remote users. Services include SharePoint site and document library configuration, structured data migration, permissions management, and post-migration validation to ensure business continuity.

What our customers are saying

“The team did a great job planning and executing the project plan. Our client was very happy with the results and how professional and timely the M3TC team was when they communicated updates or scheduled actions.”

Core Capabilities

SharePoint Online Implementation:

Configuration of SharePoint Online within an existing Microsoft 365 tenant, including document libraries, folder structures, and role-based permissions.

File Share & Cloud Storage Migration:

Phased migration of organizational data from file servers or third-party cloud storage platforms into SharePoint Online, including initial data copy, testing, final synchronization, and cutover.

User Access Enablement:

Secure access to SharePoint content through web browsers, OneDrive synchronization, and mapped drive experiences, depending on user needs.

Data Security & Recovery:

Configuration of cloud-based backup solutions for SharePoint Online with file, folder, and site level restore capabilities, complemented by native SharePoint version history.

Legacy System Decommissioning:

Assistance with disabling access to legacy file systems and retiring on-premises infrastructure following successful SharePoint migration.

These services are ideal for small to mid sized organizations, nonprofits, and professional associations seeking to modernize file storage and collaboration using Microsoft SharePoint Online while minimizing disruption and operational risk.

Why Choose M3TC?

Expertise

M3TC brings proven expertise with successful migrations tailored to each client's unique needs, ensuring a smooth and effective transition.

Service

Customers benefit from personalized service delivered by dedicated project managers and engineers who guide each step.

Cost Transparency

With cost transparency, clients enjoy clear billing, flexible payment options, and no extra support fees.

Scale

M3TC's future-proof technology provides scalable solutions that adapt to evolving business requirements.
