healthQ

COVID-19 STAFF SCREENING SOLUTION

As part of thinking about how to reconnect onsite safely, one piece is screening staff and business visitors for COVID-19, in addition to managing the related self isolation and testing workflows.

‹ Are you experiencing any of these symptoms?

Have you travelled internationally [anywhere outside Canada] within the past 14 days?

| Yes | No |

Benefits

Rapid deployment

A solution to monitor employees for emerging symptoms of COVID-19 can be deployed in under a week.

—

Simple and intuitive to use

No employee training required

—

Immediate insight into employees with COVID-19 symptoms

Quickly determine who is safe to enter the facility and who requires further assessment.

—

Streamline occupational health & safety workflows

Track staff who are screened out to support follow-up and next steps.

Get immediate insights on critical staffing impacts and back to work timelines.

—

Adhere to Physical Distancing Requirements

Enable employees to access and complete symptom assessment before entering the worksite, avoiding interactions with large groups of employees.

—

Undertake broad and frequent assessments across multiple locations

Collect employee responses via a mobile application to a symptom and exposure risk assessment surveys with a mobile app prior to entering your facility or worksite.

Key Functionality

Accessible across mobile and desktop devices

Hosted service that scales to meet your business needs

Language localization support

HIPAA, PIPEDA, and GDPR compliant

The Macadamian COVID-19 Staff Screening Solution is easily customizable to meet your unique business needs.
