

Empower your business

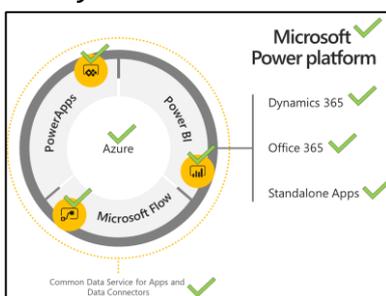

Microsoft Power platform

Why the Microsoft Power platform?

The constantly changing market demands agile organizations which can anticipate and react to changes immediately. Businesses need to respond to these changing environments and quickly deliver new business applications, to support them in their daily processes and activities.

The Microsoft Power platform facilitates these needs. Apps can, in most cases, be built without formal coding backgrounds, enabling the business to create the applications they need. The important role of IT is to facilitate the platform and help the business to move with the necessary speed. IT can focus on implementing compliance, governance and security while the business can focus on delivering business value.

Why Macaw?

Macaw believes that the best solutions will be created based on business needs and knowledge of the platform capabilities. Therefore Macaw offers three propositions to get started with this platform.

Value

Knowledge and understanding of the platform

Learn how to translate business needs into working applications

Boost employee empowerment within your company

Our propositions

App in a Day

During the App in a Day workshop, you will learn the basics of the Microsoft Power platform through hands on labs where you will experience the capabilities and possibilities of the platform. There are (free) planned classes, or Macaw can organize a class specifically for your organization.

20 persons

8 hours

5.000,-

App in a Week

As a follow up on the App in a Day workshop, Macaw developed App in a Week. Together we discuss the best business case and support you in configuring the back end, building the app and presenting the result to the stakeholders. You build the app, we support you with our knowledge and best practices to guarantee the best result.

4 persons

40 hours

10.000,-

Power platform specialists

If you don't have the time or resources to build the apps or configure the platform yourself, our experienced consultants can help you. In that case we approach it as an agile project in close collaboration with the business and IT of your organization. By engaging every stakeholder from the beginning, we assure the best possible result.
