

ESchool Management App

User Guide

Main features of the app:

- Create/delete classes,
- Create/delete subjects,
- Create/update/delete Students,
- Create/update/delete Teachers,
- Add subjects, teachers and students to the class,
- Auto-generating the classes.

Create/delete classes

1. On the left menu choose **Classes**,
2. You can see the list of the existing classes,
3. To create a class press **+ Add** and fill pop up form,
4. To delete a class press **Delete** button on the last column of the class,
5. Press the **prefix** of the class to view class details.

Create/delete subjects

1. On the left menu choose **Subjects**,
2. You can see the list of the existing subjects,
3. To create a subject press **+ Add** and fill pop up form,
4. To delete a subject press **Delete** button on the last column of the subject.

Create/update/delete Students

1. On the left menu choose **Students**,
2. You can see the list of the existing students,
3. To create a student account press **+ Add** and fill pop up form,
4. To edit a student information press **Edit** button on the last column of the student,
5. To delete a student press **Delete** button on the last column of the student.

Create/update/delete Teachers

1. On the left menu choose **Teachers**,
2. You can see the list of the existing teachers,
3. To create a teacher account press **+ Add** and fill pop up form,
4. Press the **Name** of the teacher to view teacher details,
5. In teacher details page you can attach subjects to the teacher by pressing **+ Add** button in Subjects section.
6. To delete a teacher account press **Delete** button on the last column of the teacher.

Add subjects, teachers and students to the class

1. Enter the class details page by pressing the class **Prefix**,
2. In the Subjects section you can add new subject by pressing **+ Add** button. After adding the subject you can choose the teacher of the subject by selecting the teacher from dropdown,
3. In the Students section you can add the students to the class by pressing **+ Add** in the section. You can remove the student from the class by pressing **Delete** button on the last column of the student.
