

Transform Your Telephony With Microsoft Teams Direct Routing

Move Your Old Calling System to the Cloud Teams

Direct routing enables new enterprise voice options in Microsoft Teams – and Magenium can get you there fast. Magenium offers a full-service package for building Direct Routing into your communications strategy. Included in this package is:

- An envisioning workshop with discovery and high-level project plan
- Direct routing configuration in Office 365
- Session Border Control (SBC) routing rule configuration
- Configuring up to 2 auto attendants and 2 call queues
- Training and deployment for up to 70 pilot users

All of this is included for a flat price of \$30,000.
