

FactoryEye™

Your Key to Data-Driven Smart Manufacturing

Get real-time actionable insights for cross-organizational effectiveness and increased bottom line.

Advanced Manufacturing & Organizational Intelligence

Leading manufacturers are adopting Industry 4.0 solutions for digital transformation to improve performance levels, connect and analyze data, and deliver insights to key decision-makers.

FactoryEye provides all this and more, empowering medium-sized manufacturers to continuously improve and attain operational excellence from shop-floor-to-top-floor, without changing existing systems and infrastructure.

FactoryEye delivers a holistic view of the entire manufacturing organization by contextualizing data from legacy and production floor systems to empower your people at all levels with real-time actionable intelligence to make the optimal, fact-based decisions needed for business excellence.

FactoryEye Gives You

- Centralized visibility across operations
- Access to information necessary to quickly make smart decisions
- Flexible, simplified and incremental digital transformation
- Rapid time-to-value and ROI
- Increased equipment productivity and operational efficiency
- Improved machine uptime and reduced maintenance costs
- Tools and technology to promote continuous improvement

FactoryEye - The Clarity for Optimal Data-Driven Decisions

Compatible with existing factory and corporate systems

Eliminates data silos and point-to-point integrations

Connects to all your systems, from factory floor to top floor

Enables real-time notifications

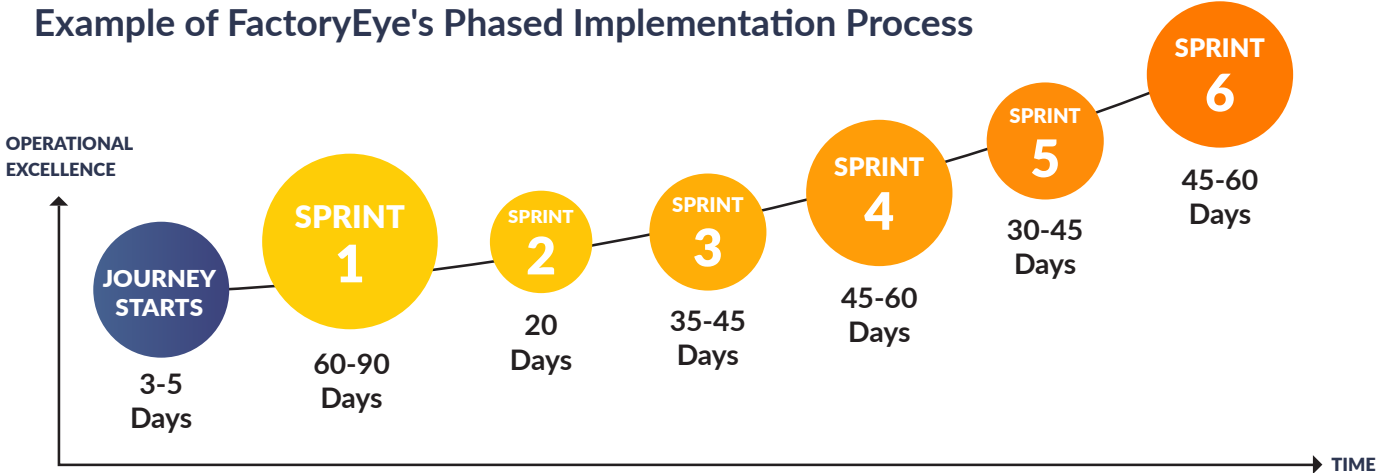

Provides dashboards and reporting

Ongoing ROI, Phase by Phase

FactoryEye’s powerful integration engine overlays legacy systems. Incrementally enhancing the deployed functionality in a phased process based on your priorities, ROI is quickly achieved at each sprint, ready to cover your next phase of enhancements.

The value achieved in each sprint helps you stay on track with your digital transformation, clearly proving the benefits to all stakeholders.

Example of FactoryEye's Phased Implementation Process

Example Business Priorities Per Sprint

Start	1	2	3	4	5	6
Roadmap Evaluation	Production Data	Workflow Improvements	Reject Analysis	Material Control	Planning Calculations	Machine Learning

FactoryEye Provides:

Factory Floor Optimization

- MES Insights
- IIoT & machine data aggregation
- Alarm management
- Digital forms for a paperless factory

Integration of Existing Systems

- Integration hub for manufacturing and corporate systems
- Plug-and-play connection with 100+ certified connectors

Data Processing

- Contextualizes data from all sources across the organization – including structured and unstructured data
- Provides a schema for data queries and additional services

Real-Time Insights

- Factory dashboards
- Mobile notifications
- Role-specific dashboards and data access

Reporting

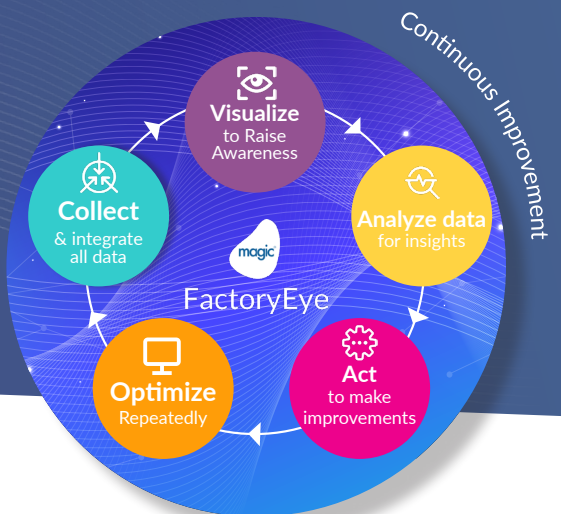

- Standard key factory information reports, including OEE, OOE, PE, on-time delivery, profitability, quality, customer satisfaction, and more
- Customizable reports

Secure Cloud

- Azure cloud
- SSO/OAuth integration with existing authentication mechanisms

Artificial Intelligence

- Predictive maintenance
- Anomaly detection

Get smart now!

Manufacturing & organizational intelligence for smooth migration to a data-driven organization powered by FactoryEye’s modern architecture.
