

Integration for Accelerated Digital Transformation

Magic xpc iPaaS Platform: Connect the Microsoft ecosystem faster with any other system - across all public and private clouds and data sources

Cloud, IoT, mobile & on-premises systems have created heterogenous IT landscapes, with data silos, manual processes and point-to-point connections, resulting in a higher TCO and lower productivity.

A hybrid, microservices-based integration platform will speed up integration projects, slash costs for maintenance and improve productivity and business process performance.

What Is Magic xpc?

Magic xpc is a modern 100% cloud-native, microservices based integration platform with an intuitive and user-friendly interface, including walkthrough screens, a graphical data transformation and a mapping designer, ideal for IT pros, business analysts and integration specialists.

Why customers use Magic xpc iPaaS Platform

- Time spent on integration reduced by up to 80%
- Deployable in the cloud, behind a firewall or both
- Horizontally and vertically scalable
- Runs natively on Azure

From Microsoft to Any Application or Endpoint

- Magic xpc runs on Azure
- Optimized TCO
- Microservices-based architecture
- Ideal for the Microsoft ecosystem
- Perfect fit for complex multi-cloud, on-premises & IoT projects

Application to Application

- 60 integration components
- 5-10 times faster projects
- Eliminate data and applications silos
- Optimize productivity for sales, service, production and more

Business to Business

- Cloud & on-premises integration scenarios
- Scalable integration of Microsoft systems to any other system
- Boost customer and employee satisfaction

The Path to Subscription & Cloud

Fast Integration of Applications

Hybrid Integration Scenarios for Improved Business Processes

“By integrating our systems with Magic, we get a 360-degree real-time view of our customer information. Automating our workflows and business processes lead to increased productivity and reduced human errors.”

- Ewald Hillebrand, Aerzener Maschinenfabrik GmbH

The Benefits of Magic xpc: A Perfect Fit for Integrating the Microsoft Ecosystem

Integrate, Automate & Sync Data from any System with the Microsoft Ecosystem

- Pre-built connectors for Microsoft Dynamics CRM, AX, NAV, 365, Office, Sharepoint, SQL and more - both Cloud & On-Premises
- Accelerated processes with significant increase in productivity
- Runs natively on Azure

Digital: Central Connectivity on the Cloud

- Easy to use, user-friendly - Fast implementation
- Connect on-premises, legacy with cloud - Hybrid integration
- Business information is encrypted & secured - Strong security

**Magic's integration scenarios, including Microsoft systems and the option to run on Microsoft Azure*

The Magic xpc iPaaS Platform Offer

Our promise to you

Fast implementation, easy to use, low maintenance costs, perfect for fulfilling the vision of running everything on Microsoft Azure in a digitally transformed enterprise.

- Low cost & risk
- Wide range of Microsoft connectivity
- 100% cloud native
- Robust performance

Magic Benefits

- Easy and cost-effective maintenance
- Automatic updates and upgrades
- Real-time data for accurate information
- Microservices-based iPaaS
- Subscription based, flexible pricing model
- Ready for multi-cloud architectures
- High performance integration platform
- Consolidates and brings services to Azure

Why Magic Software?

Magic Software Enterprises provides powerful and versatile end-to-end integration solutions. Magic enables its customers to digitally transform their business, automate their processes, adopt new technologies and maximize business opportunities.
