

Power Platform & Dynamics 365 PoC Offer

We are experts in the Power Platform, but we understand that it can be a difficult task to understand where to start your technology journey. There are so many options to navigate, what technologies are the best to use and how do you choose the first team or business unit to start the process?

WHAT WE OFFER

This offer allows you to sign up to a **4-6 week Proof of Concept** where our experts will run you through an envisioning workshop, discover what is possible by aligning technology investments to business goals, create a solution in order for others within your organisation to see the value and achieve the set business outcomes.

Step 1: Envisioning Workshop Includes:

The process includes workshops with key stakeholders to identify business objectives, processes, and technology. We will understand the technology environment and system landscape and build Requirements Documentation that will include a tailored solution roadmap and scope for the Proof of Concept.

Step 2: Execution:

This process moves from the requirements and into execution and includes solution creation. We will build your Proof of Concept to show business value.

Step 3: Review

This process includes a review of the requirements and business outcomes set for the outset to relay to the business that they were achieved. Share the wins that were achieved and map out concrete steps to any next steps in terms of the adoption of the Power Platform.

ABOUT MAGNETISM SOLUTIONS:

We work with our clients to unleash their potential through our smart use of technology. Great customer relationships are the core to any business, and that's why Microsoft Dynamics 365 should be at the heart of yours. Contact us today to understand more about the offer.

Why Dynamics 365?

Modern applications

Modern applications that deliver new experiences and connect with a businesses' existing systems to allow organizations to digitally transform their way. Applications that use mixed reality, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices, and micro-applications to drive intelligence and inform a more effective business process.

Unified data and processes

Unified data and processes that enables business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data to a single network.

Intelligence that delivers

Intelligence that delivers actionable insight. Data in the new world includes social, relationship and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

An extensible environment

An extensible environment that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.

HOW MUCH WILL IT COST?

The total price depends on the scope of work and the resources needed to complete the Proof of Concept – we will agree this with you prior to starting the project.

Key use cases

Sales

Respond to changing business requirements with a flexible platform to rapidly create new solutions and ensure old solutions are never truly finished.

Services

Understand your customers better and respond more quickly by accessing internal and external relationship data.

Finance and operations

Integrate your finance systems so you have one complete view of your customer or members.

Stakeholder Management

Extend your virtual team and coordinate faster with a consolidated view of team members, activities, and responsibilities.

Marketing

Gain end-to-end visibility by connecting data from external markets, social, and legacy sources.
