

Azure Security Bootstrapping for an optimal security posture

ABOUT MAIBORNWOLFF:

MaibornWolff stands for excellence in software development and consulting since 1989. Focusing on our customer and end users, we put human beings at the center of all our efforts. We approach Cyber security as a holistic endeavor looking at humans, organization & processes and the underlying technical foundation.

See what customers are saying:

„MaibornWolff facilitated the implementation of solutions based on a combination of Azure services. Implementation was swift and well secured. Security measures were well adjusted to the solutions and leveraged the potential of azure security services.“

– Adrian Reichelt, CTO, DCS

WHAT WE OFFER

When you start moving workloads to Azure, you need to ensure you have an optimal and adequate security posture.

Our 8 week Azure Security Bootstrapping implements a best practice Hub and Spoke architecture and sets up Azure security products that have the greatest impact, so they can be used in day-to-day operations. In addition, you will get a roadmap for further strengthening your cloud security architecture.

MaibornWolff will work closely with your business and technical stakeholders to achieve this:

- Stocktaking of your current Azure landscape
- Threat and risk analysis for your workloads
- Setup and configuration of Azure security products based on your risk profile
- Calculation of the Total Cost of Ownership (TCO)

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
