mailguard 365

ISO/IEC 27001:2022 Certified

Strengthen your Microsoft 365 email security against advanced 'zero zero-day' phishing, ransomware and sophisticated BEC attacks.

The challenge of email-borne cyberattacks is not a new one. It's a global epidemic that is crippling businesses, destroying reputations and having devastating economic repercussions.

EVERY COMPANY HAS HAPPY CLICKERS

"Every company has at least one employee who will click on anything, and that is pretty hard to protect against."

Brad Smith,
Microsoft President & Chief Legal Officer

MULTI-LAYERED SECURITY

Experts agree that a multi-layered approach to email security is required. Gartner reports that *'35% of client organizations that move to Office 365 are supplementing its natively available email security capabilities with a third-party product.'*

BOOSTING MICROSOFT 365 SECURITY

Businesses want a simple solution that enhances the value in Microsoft 365 by adding a specialist email solution to their security stack, without the need to train end-users or to configure and manage another admin console.

Microsoft

MailGuard 365

Speed to detect and stop sophisticated email threats is the advantage of using MailGuard 365 with Microsoft 365. Integrated with Microsoft 365 security for enhanced protection, it's proven to be up to 48 hours faster in threat detection. Adopting a 'Better Together' approach, it combines specialist cloud email security expertise and IP from MailGuard, with the best of Microsoft, delivering a native ICES (Integrated Cloud Email Security) solution in a single click.

STOP CRIMINAL INTENT EMAILS

Phishing, ransomware, BEC are things we never want to personally experience. Working on the inside of Microsoft 365, MailGuard 365 re-scans & stops email threats after they have passed through Microsoft 365, providing added protection for your business.

EVIDENCE-BASED REPORTING

With its evolutionary approach, MailGuard 365 is last to inspect emails, allowing for evidence-based reporting that demonstrates its stopping power, and complementing upstream services like the Microsoft 365 security stack (incl. Defender) and any 3rd-party vendors.

ACCELERATED PROTECTION – UP TO 48 HRS FASTER

Speed is the new currency, and MailGuard 365 leads the market in finding & stopping threats. Proven to be up to 48 hours faster in threat protection, it stops advanced criminal intent email threats from reaching end-user inboxes.

Microsoft

MailGuard 365 + Microsoft 365

Exclusive to the Microsoft Marketplace, MailGuard 365 is an Integrated Cloud Email Security (ICES) solution, integrated with Microsoft 365 security (incl. Defender) for enhanced protection. MailGuard is a pioneer in cloud email security, so customers benefit from over two decades of specialist threat protection IP, including proprietary heuristic algorithms, and machine learning (ML), further enhanced by generative AI.

SINGLE-CLICK ACTIVATION

Frictionless activation delivers enterprise-wide protection within a minute. No download required as MailGuard 365 works from the cloud and is activated with your Microsoft credentials. Your organization is protected with a single click, with advanced criminal intent email threats stopped immediately.

NO END-USER TRAINING

Designed to provide peace of mind for your end-users, MailGuard 365 operates in stealth within the native Microsoft 365 environment. Threats are instantly moved to users' junk and deleted items folders, so no additional training is required.

EASY FOR ADMINS AND PARTNERS

For admins and partners, it's easy too. No configuration is required for set-up, and there's no quarantine email to manage, or consoles to administer. Whitelists and blacklists in Microsoft 365 are honored.

Customer success:
Victor Valley Transit (VVTA)

"We were tired of the constant phishing and targeted attacks. It's been working great, and near misses have gone down tremendously since using MailGuard 365."

– SNR. NETWORK ADMIN, VVTA
(Public Transit Authority in California)

FIRST TO STOP TARGETED EMAIL THREATS

"We receive a lot of malicious emails, and we did have an incident with a ransomware attack. It was a nightmare having to deal with it. We experienced near misses roughly every two months."

ENHANCED EMAIL SECURITY

"There are always documents and links being opened and clicked. Cybersecurity has changed tremendously over the past few years. With ransomware becoming a lot more prevalent, it's changed the landscape entirely. We must always be vigilant about what's out there."

RELIABILITY IS VITAL

"Cybersecurity is critical to VVTA. We are a public transportation authority, and we want to make sure all the network resources are available 365 days a year, 24/7.

Channel partner success: JASCO

"MailGuard 365 just works – we have been selling MailGuard for several years as the best-of-breed email security solution."

– TEAM LEADER, JASCO CONSULTING

COMPLEMENTING MICROSOFT 365

Jasco Consulting is a trusted Microsoft partner that provides information security solutions to manage clients' risks. So, it was concerning when clients using Microsoft 365 reported email threats slipping past their existing security filters. MailGuard 365 was a perfect solution, with evidence-based reporting demonstrating the additional threats stopped.

PROTECTING SENSITIVE DATA

"The MailGuard 365 solution is just so simple to deploy, and it instantly protects our clients from email threats that slip through third party or Microsoft 365 email security."

SIMPLE SET UP & NO TRAINING REQUIRED

Best of all, MailGuard 365 is simple to set up with minimal disruption to clients. Activated with a single-click using your Microsoft credentials, no DNS or MX-record change is needed. Plus, it works in the native Microsoft 365 environment, so no end-user training is required.
