MAISON CONSULTING & SOLUTIONS'

PROVEN STEPS TO UPGRADE FROM DYNAMICS AX TO MICROSOFT DYNAMICS 365

Solution Review

Initially, a detailed review of your current ERP systems and your additional requirements would be carried out to come up with an upgrade proposal

Analysis

A risk evaluation exercise which is based on deployment options, current system architecture, configurations, and customizations

Upgrade

This step includes the analysis and evaluation of multiple aspects of the upgrade to craft a strategy and statement of work

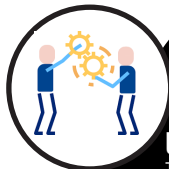

Migration

It includes auto or manual code migration and data migration, code re-factoring and development, and reconfiguring security roles

Unit Test

Entails testing BI/Reporting, examining interfaces, running migration tests and uploading solution for concerned certification

UAT

The objective is to ensure the readiness of the ERP system with user acceptance testing, training, and change management

GO LIVE

After multiple analysis and testing, the team goes live with the new cloud ERP

Support

Application support involves the assistance provided after the deployment
