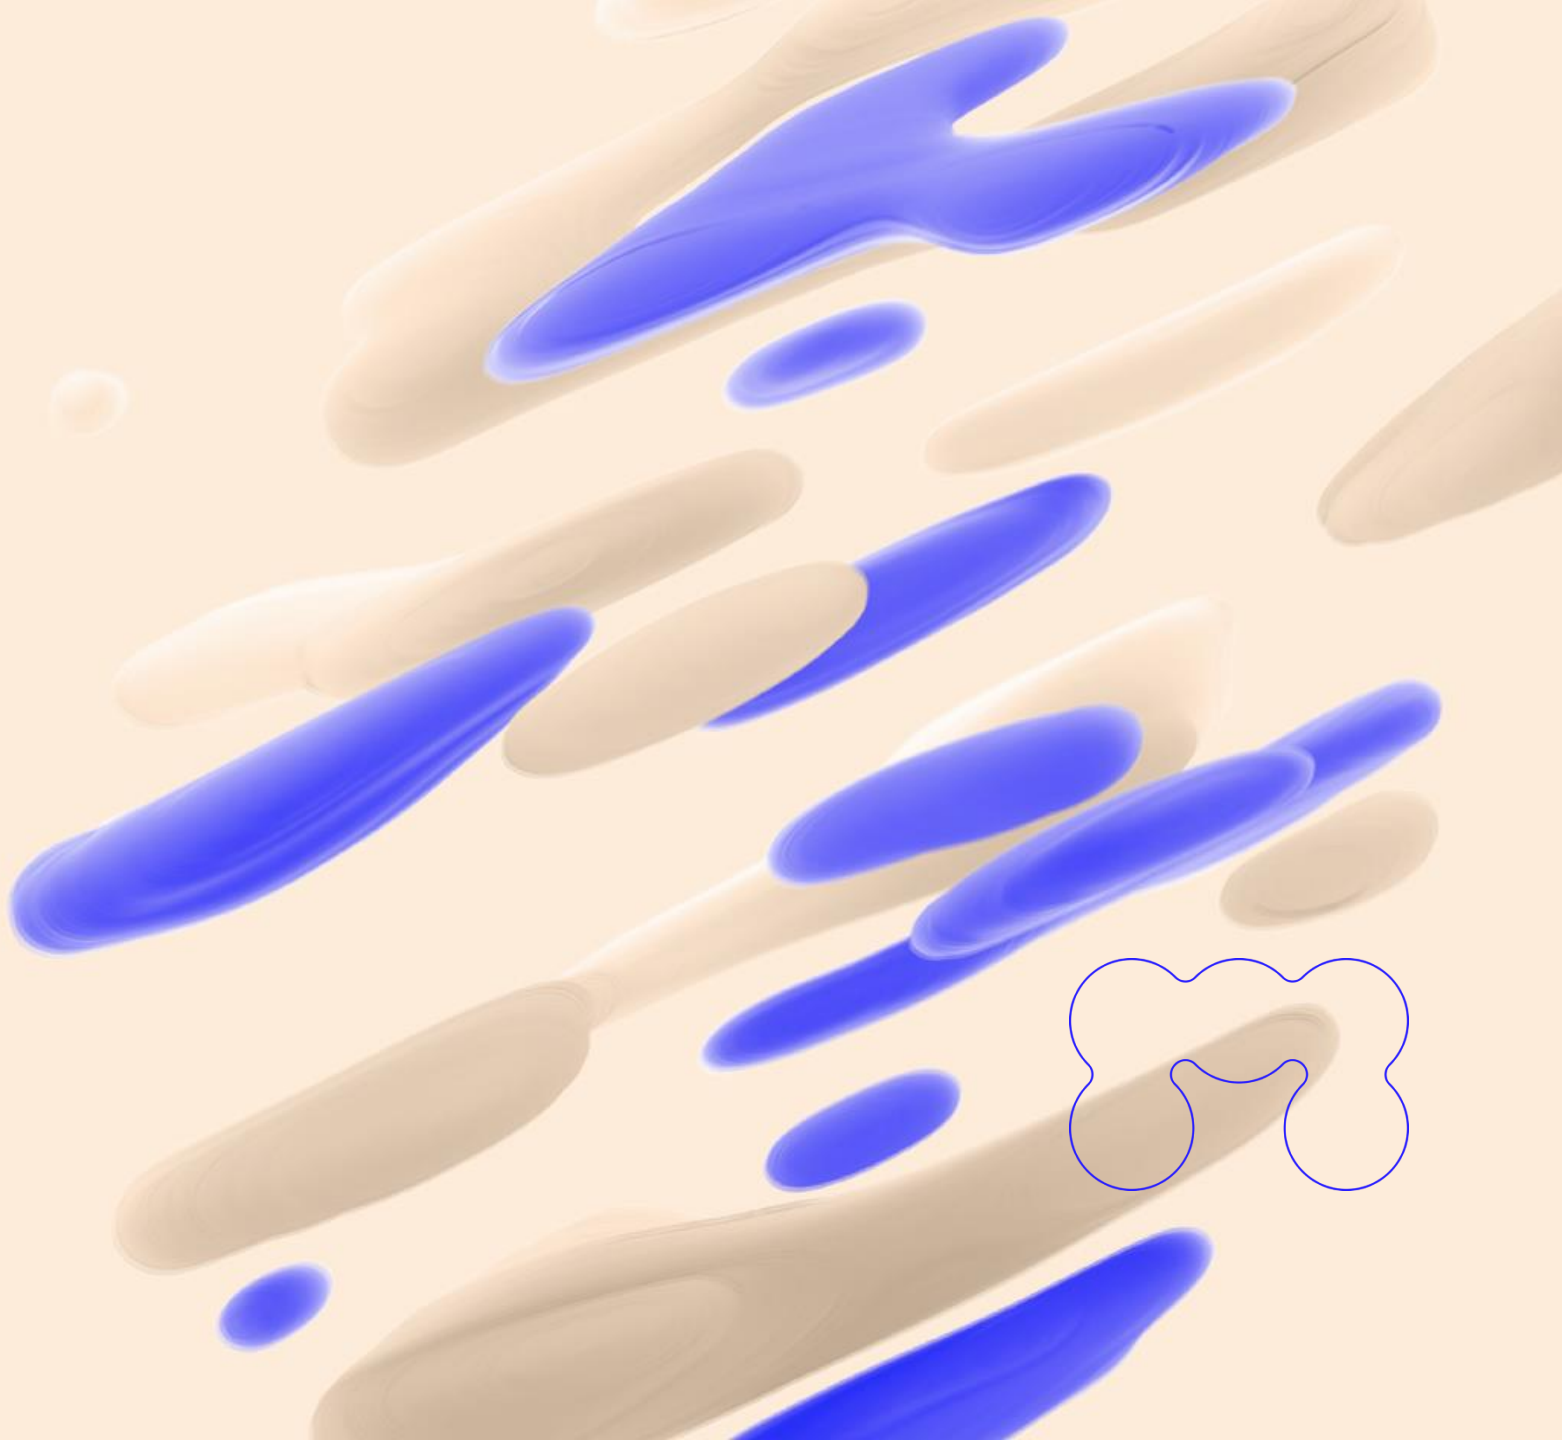
CLOUD MATURITY ASSESMENT



Sometimes the cloud just happens in organizations, and planning comes later. Review the level of maturity of your existing cloud solution, and how the architecture, security and performance match the requirements of a well-designed solution.

WHY

- Understand the lifetime expectancy of legacy cloud solution
- Need to understand if your cloud solution poses security or compliance such as GDPR risks?
- Is your architecture cost efficient?
- Understand how the security has been handled and if there are clear shortcomings
- Are there licencing issues with your cloud solution?

ISSUES COVERED DURING THIS REVIEW

- Architecture drawing of the actual running system as it exists in Azure
- Report of issues found during the review
  - Security
  - Life cycle (any dependencies to services which are known to be deprecated)
  - Design issues affecting costs
  - Architecture quality
- Recommended next steps for the solution

WHAT WE EXPECT FROM YOU

- Relevant stakeholders available if needed
- Access to resources to be evaluated

DELIVERABLES

- Written report of actions to be taken

PRICING

- 3000 € + VAT per subscription
