

Microsoft Viva Implementation with Managed Solution

Create
connection in a
hybrid work
environment

About Us

We are Managed Solution. A national Managed Service and Help desk provider. Our MISSION: We are a technical team with a passion for customer service. Our desire is to be known for our exceptional service with the ability to guide our customers toward strategic IT initiatives that will enhance their business outcomes.

We Value

TEAMWORK

INTEGRITY

INNOVATION

We Believe

We BELIEVE people are at the center of technology. We BELIEVE customers should own their data, every interaction should result in a smile. We BELIEVE in creating community within our culture. We BELIEVE in creating excellent digital experiences.

MANAGED SOLUTION

"This entire process was seamless! From start to finish there was constant communication, which made for a very low stress transition. The team was fantastic to work with and responded to all question and concerns quickly. In regards to the actual support outside of the implementation, my team has been very happy thus far on how quickly support responds and how easy it has been working with them. I would highly recommend Managed Solution to anyone in need of IT support."

Elizabeth Banker, CEO, Shore Solutions

Key metrics

Managed Solution guides our customers through our proven methodology to digitally transform their company which enables them to increase collaboration, security, and ongoing support while optimizing their current technology investments.

94 CSAT
Help Desk Score

TOP 1% Cloud Solution Provider

SOLUTION

Microsoft Viva Connections is an employee experience platform that offers a comprehensive suite of tools for managing and enhancing employee communication, collaboration, and productivity. Designed to help organizations create a work environment centered around employee well-being and engagement. Viva Insights provides powerful insights into employee satisfaction and productivity levels, giving companies the data they need to make informed decisions about workplace policies and procedures. Managed Solution wants to improve collaboration within the Office 365 platform. Our target audience for this offer is already using Microsoft Teams but does not have a centralized location for users to locate documents productively. Managed Solution recommends leveraging Viva Connections to create a centralized, intranet solution built within the Microsoft Teams environment.
