That's why we're proud to offer Microsoft Sentinel Deployment Packages, the ultimate solution for protecting your business from cyber threats. With advanced security features and simplified deployment, Sentinel makes it easy to keep your network safe and secure. So why wait? Take the first step in protecting your business and try Microsoft Sentinel today!"

Protect Your Network, Protect Your Business

Our Process

Deploying our Microsoft Sentinel Packages is quick and easy! Here's what you can expect:

1. Contact our team to discuss your specific security needs and receive a free workshop assessment to include personalized recommendations for the best sentinel package for your business.

2. Once you've chosen the right package, our team will work with you to set up and configure sentinel on your network.

3. Sit Back and let sentinel do the magic! With advanced security features and proactive threat detection, the sentinel will keep your network safe and secure around the clock.

Success Criteria of the Deployment

- Data Sources are populated correctly to the Microsoft Sentinel
- Logs are parsed if it's required correctly
- The Alerts have relevant raw logs for triage and analysis.
- The alerts can pivot to raw logs and enhance the hunting campaign
- Increase the level of automation to showcase the dwell time & Mean time to Resolve / Respond (MTR) Improvement
