

Workplace Management Made Simple

Most companies juggle multiple tools and processes to manage their workplace. Mapiq simplifies this by consolidating everything into one simple and intuitive platform that flexes to your business needs without overcomplicating things.

You get better use of your office space because you understand how it's actually being used. Your employees can plan their office days with a single click. Your operations team spends less time on busy work and more time on what matters.

The bottom line: you get a workplace that actually works for everyone using it.

Many Complex Jobs. One Simple Platform.

Space Planning

Automatically translates data into actionable workplace insights to make immediate space improvements at policy, neighborhood, and portfolio levels.

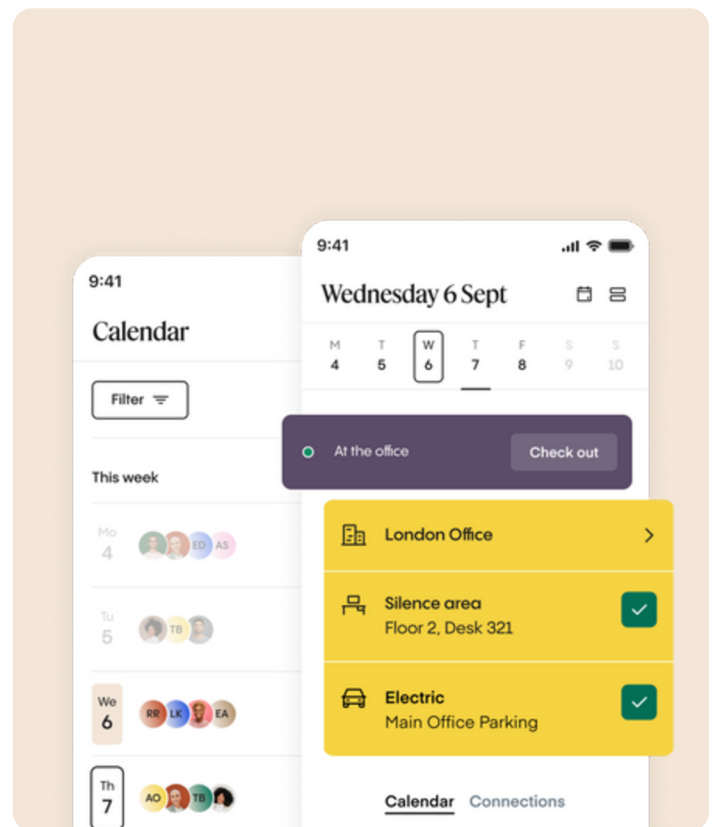

Employee Experience

Booking tools, access control integration, and wayfinding kiosks to support your teams day at the office from start to finish.

Workplace Operations

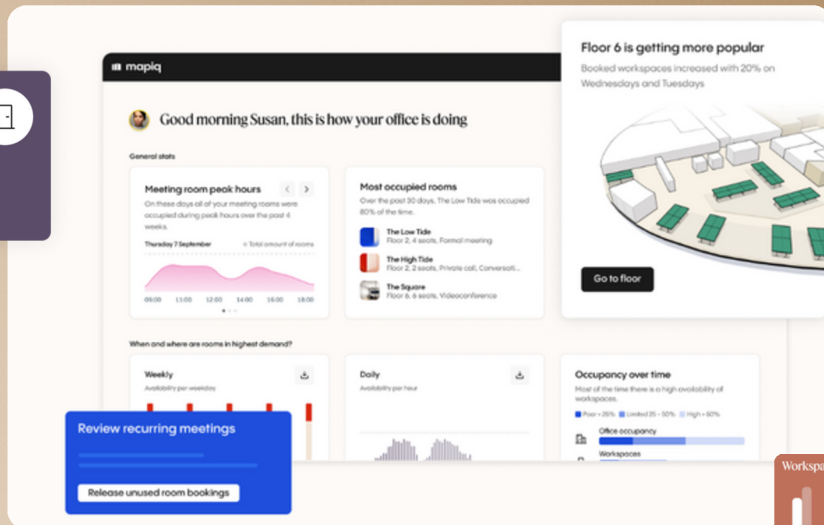

Automated visitor management, simplified meeting requests and ticketing, all managed from a single app.

Make Your Office Fit Like a Glove
