LIST OF

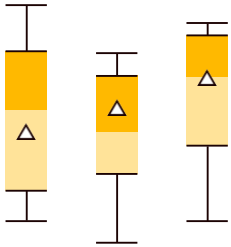

# Visuals

## Bowtie Chart PBI Certified

Show the flow of data from one process or category to another to compare key values

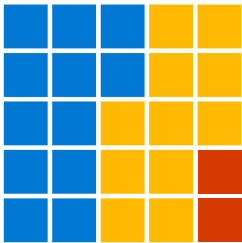

[View on AppSource](#)

## Box and Whisker PBI Certified

Understand the mean, median, and quartile distribution of your data

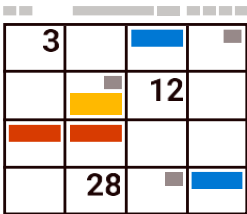

[View on AppSource](#)

## Brick Chart PBI Certified

Show the percentage breakdown of a data set with multi-color shaded bricks

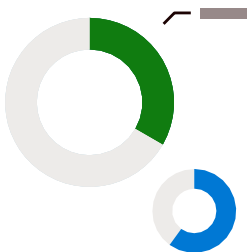

[View on AppSource](#)

## Calendar PBI Certified

View key events directly on your Power BI reports in a calendar view

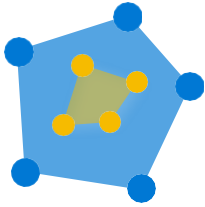

[View on AppSource](#)

## Circular Gauge PBI Certified

Illustrate your progress toward goals in a pie or donut chart

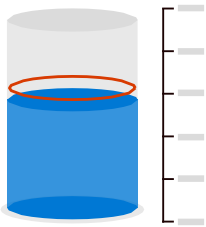

[View on AppSource](#)

## Clustering Using OPTICS

Analyze groups within a data set using density-based clustering algorithm OPTICS

[View on AppSource](#)

## Cylindrical Gauge PBI Certified

Compare metrics against target values or capacity with an intuitive 3D cylinder visual

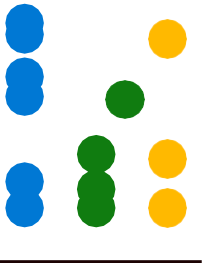

[View on AppSource](#)

## Data Insights PBI Certified

Gain deeper insight into data by viewing it in different formats: horizontal bar, vertical bar, brick chart, or tabular

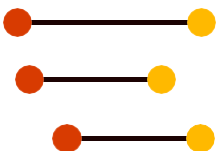

[View on AppSource](#)

## Dot Plot PBI Certified

Display distributions across multiple categories to highlight gaps, clusters, and outliers

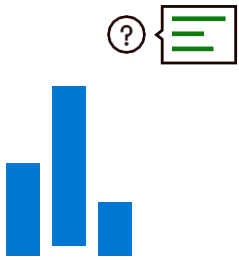

[View on AppSource](#)

## Dumbbell Chart

Represent critical business measures over time or across various categories

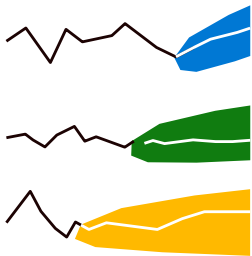

[View on AppSource](#)

## Dynamic Tooltip

Enhance the readability of Power BI reports by providing additional data points as tooltips

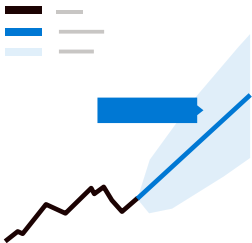

[View on AppSource](#)

## Forecast Using Multiple Models

Forecast future values based on historical data using several forecasting models: Linear Regression, ARIMA, Exponential Smoothing, and Neural Network

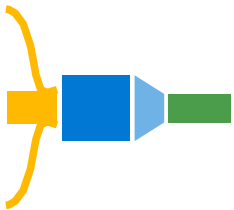

[View on AppSource](#)

## Forecast Using Neural Network

Forecast future values based on historical data using a Neural Network algorithm

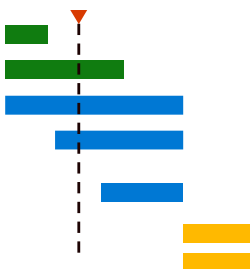

[View on AppSource](#)

## Funnel with Source

Track the data pipeline from end to end by grouping data into stages while highlighting each data source

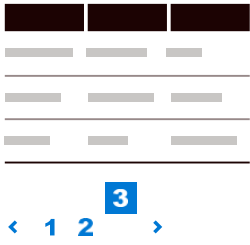

[View on AppSource](#)

## Gantt Chart **Premium plans available**

Monitor project milestones and deadlines while keeping track of key performance indicators with a unique grid feature

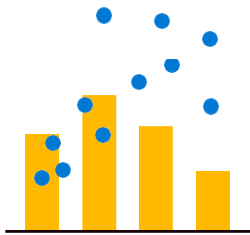

[View on AppSource](#)

## Grid PBI Certified

Navigate large data sets with ease by showcasing data in a paginated grid format that can be sorted

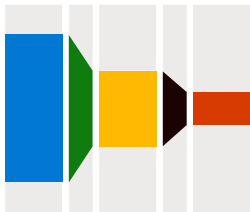

[View on AppSource](#)

## Histogram with Points PBI Certified

Compare distribution density (histogram bars) against actual values (points) to identify where data clusters

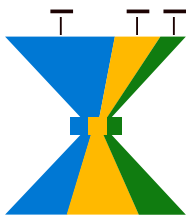

[View on AppSource](#)

## Horizontal Funnel PBI Certified

Break down the various stages and relevant metrics of a process into funnel segments

[View on AppSource](#)

## Hourglass Chart PBI Certified

Compare category values across two scenarios (such as before and after an event)

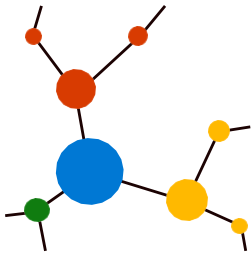

[View on AppSource](#)

## Image Carousel Chart

Showcase a collection of images with a sliding carousel

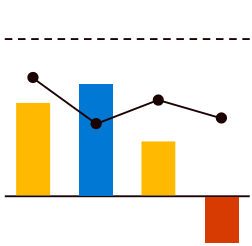

[View on AppSource](#)

## Journey Chart PBI Certified

Transform dense statistical data into a network of categories and relationships

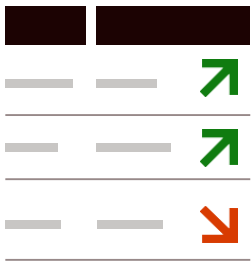

[View on AppSource](#)

## KPI Column PBI Certified

Measure progress toward key performance indicators (KPIs) with an integrated line and column chart (color-coded columns mark performance: the line represents KPI targets)

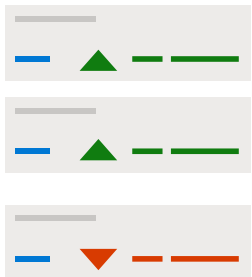

[View on AppSource](#)

## KPI Grid PBI Certified

Display data in hierarchical order with the option to separate categories and illustrate trends

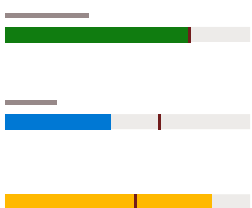

[View on AppSource](#)

## KPI Ticker PBI Certified

Display multiple key performance indicators (KPIs) in an automatically rotating visual

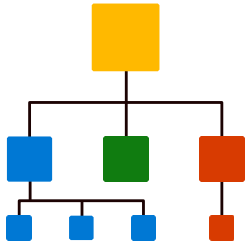

[View on AppSource](#)

## Linear Gauge PBI Certified

Compare progress against identified goals and warning zones at a glance

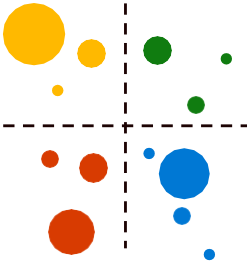

[View on AppSource](#)

## Organization Chart

Display the hierarchy within an organization or function area

[View on AppSource](#)

## Quadrant Chart 🌟 PBI Certified

Represent data in separate quadrants to show distribution and items that share common traits

[View on AppSource](#)

## Radar Chart 🌟 PBI Certified

Compare data across three or more variables in a single two-dimensional chart

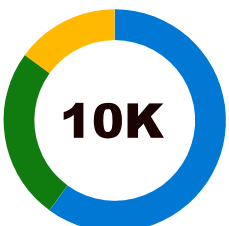

[View on AppSource](#)

## Ratings 🌟 PBI Certified

Indicate performance or approval scores within your Power BI reports

[View on AppSource](#)

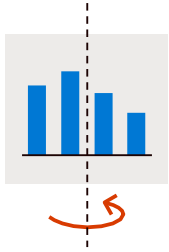

## Ring Chart 🌟 PBI Certified

Display relationships between values by dividing data into segments of a ring

[View on AppSource](#)

## Rotating Chart PBI Certified

Showcase multiple key performance indicators with a bar chart that rotates on the horizontal axis to display new values

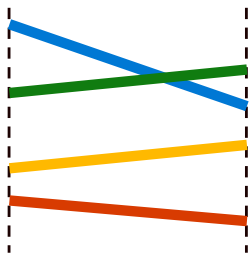

[View on AppSource](#)

## Rotating Tile PBI Certified

Display multiple key performance indicators (KPIs) with an automatically flipping, customizable tile

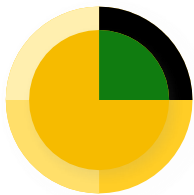

[View on AppSource](#)

## Slope Chart

Analyze trends in your data by viewing the upwards or downwards slope between two data points

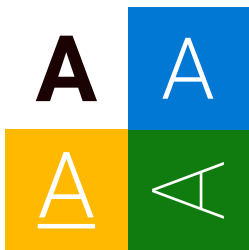

[View on AppSource](#)

## Sunburst PBI Certified

Break down hierarchical data using color-coded concentric rings

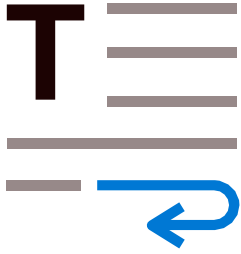

[View on AppSource](#)

## Text Enhancer PBI Certified

Customize text in your Power BI reports by adjusting shadow, rotation, alignment, and more

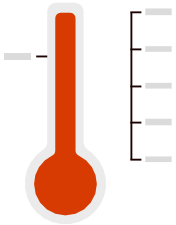

[View on AppSource](#)

## Text Wrapper

Represent complete data by enabling text wrapping on Power BI reports

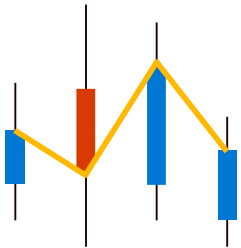

[View on AppSource](#)

## Thermometer

Represent progress toward goals with a highly customizable thermometer graphic

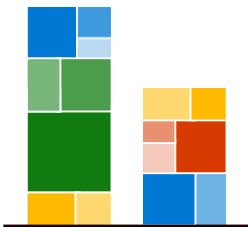

[View on AppSource](#)

## Trading Chart

Break down historical trading records into a simple, color-coded chart

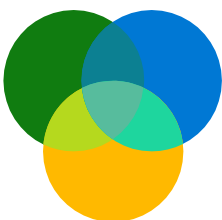

[View on AppSource](#)

## Treemap Bar Chart

Categorize hierarchical data with color-coded, proportional rectangles

[View on AppSource](#)

## Venn Diagram

Compare and contrast your data across two or more data sets

[View on AppSource](#)
