

Microsoft 365 Copilot: 1-Day Workshop

Looking to elevate your business processes?

Learn how Microsoft Copilot Studio can transform your workflows and drive efficiency

Key Benefits

Alignment on the potential for extending Copilot or building your own Copilots.

A prioritized roadmap for AI integration.

Practical insights into the capabilities of Microsoft Copilot Studio.

Recommendations and next steps for successful implementation.

In this workshop, you'll discover how AI-driven solutions can transform your workflows, increase productivity, and reduce costs. We'll explore the capabilities of Microsoft Copilot Studio and provide a tailored approach to integrating intelligent AI assistants into your operations.

Agenda

Readiness Assessment

- Gather information about your readiness for conversational AI solutions
- Identify key decision-makers and stakeholders.

Envisioning Session

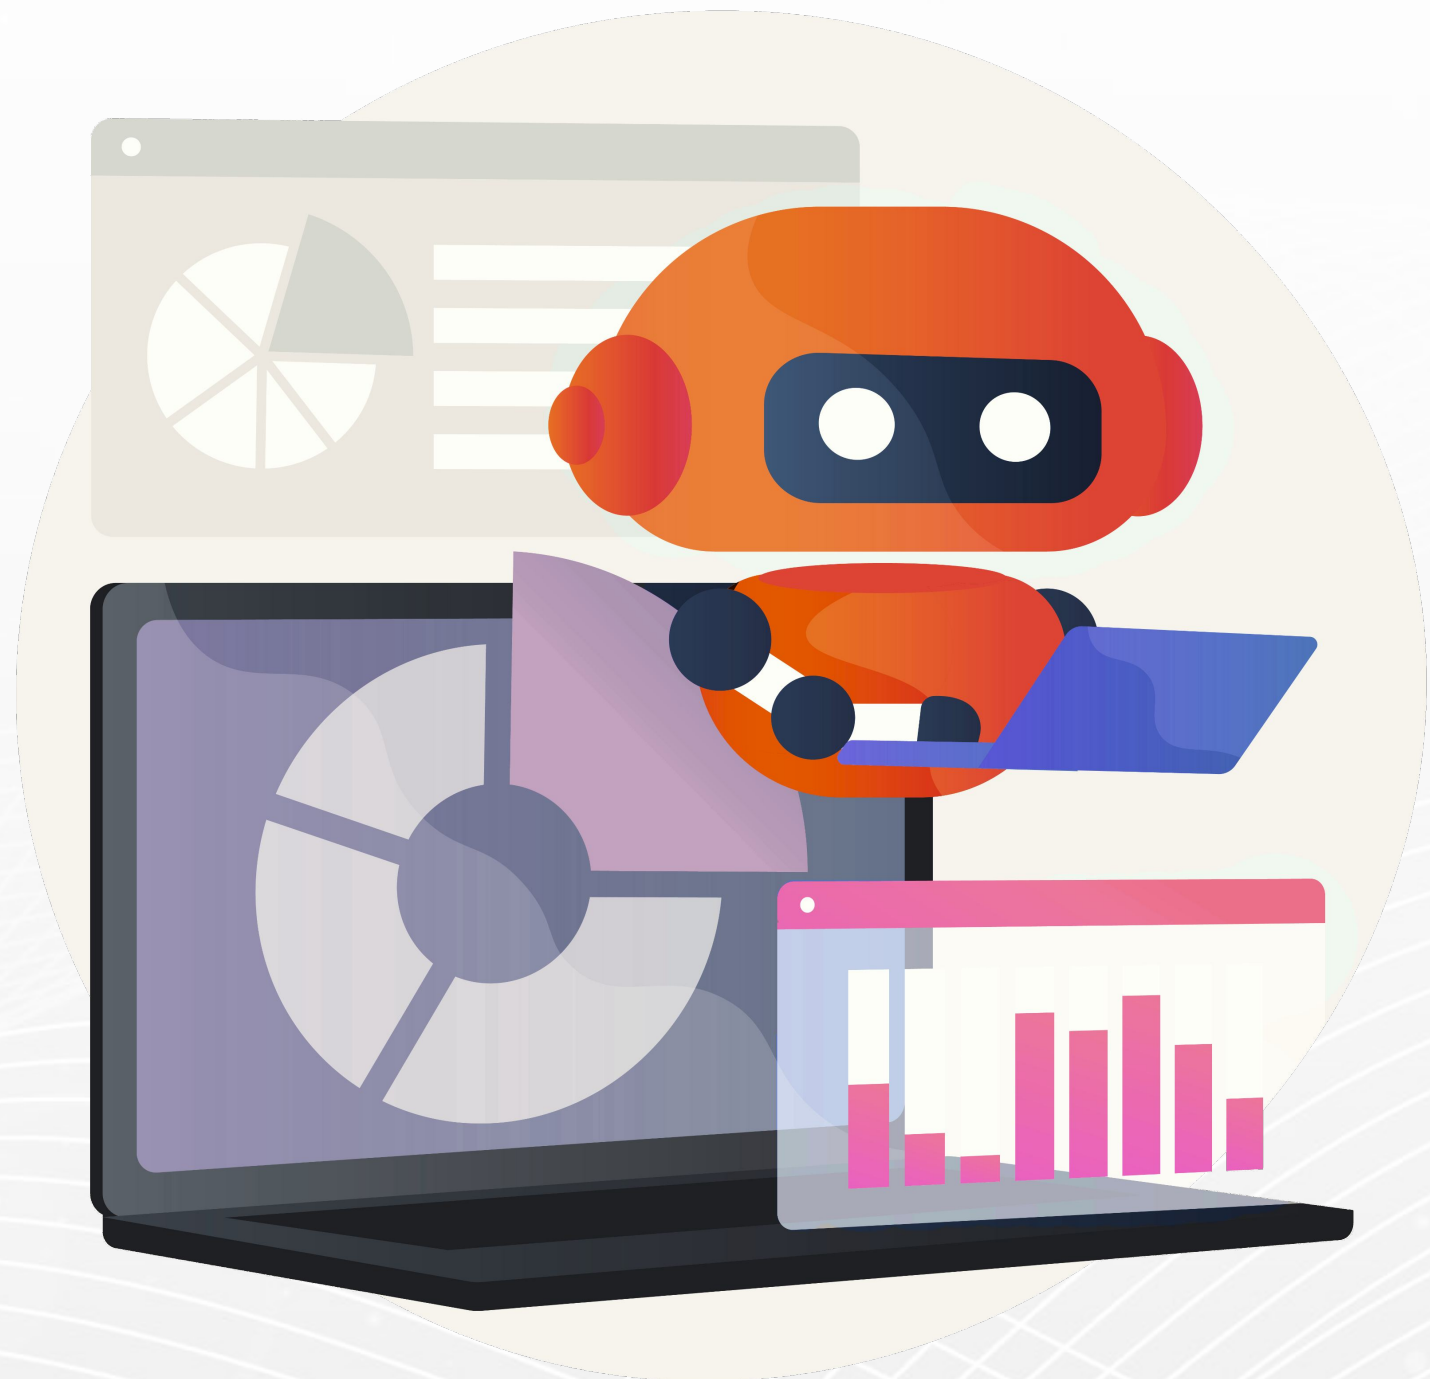

- Receive an introduction to Microsoft Copilot Studio.
- Build a vision for innovation with Copilots that align to your business needs.
- Learn about Copilot Studio's capabilities through demonstrations.

Persona and Use Case Identification

- Identify key personas and high-value use cases.
- Focus on impactful areas for your organization.

Actionable Plan

- Develop a plan to address gaps found in the readiness assessment.
- Implement high-value use cases based on the assessment.

Our Implementations in the Field of Gen AI

AI Powered Customer Assistant

Automated customer support with AI assistants and Interactive Copilot.

Customer Behavior Analysis

Analyze historical data and Predict future behavior with Gen AI.

Real-Time Language Translation

Implement AI services to provide instant translation, enabling seamless communication in multiple languages.

Knowledge Base Enhancement

Enrich knowledge base with AI-generated content and insights from customer inquiries and feedback.

Empower Your Business

By participating in our workshop, you will get to know about:

- **Solving business challenges:** Use intelligent AI assistants to dynamically query business knowledge and complete workflows.
- **Driving productivity:** Reduce manual processes, allowing employees to focus on high-value initiatives.
- **Reducing costs and risks:** Empower your team to develop scalable, secure solutions quickly and efficiently.

Specializations

1. AI and Machine Learning in Microsoft Azure
2. Analytics on Microsoft Azure
3. Build and Modernize AI on Microsoft Azure
4. Data Warehouse Migration to Microsoft Azure
5. DevOps with GitHub on Microsoft Azure
6. Kubernetes on Microsoft Azure
7. Migrate Enterprise Applications to Microsoft Azure
8. Cloud Security
9. Threat Protection
10. Business Intelligence
11. Low Code Application Development
