MAQ Software

We exist to build great software

About us

As the 2021 Microsoft Power BI Partner of the Year and a 2023 Microsoft Fabric featured partner, we enable leading companies to accelerate their business intelligence and analytics initiatives. Our solutions enable clients to improve their operations, reduce costs, increase sales, and build stronger customer relationships.

Our clients consistently recognize us for providing architecture and governance frameworks, implementing best practices to optimize reports, and building team capability through training programs. Our innovative tools and 40+ certified visuals expand Power BI capabilities to save time for decision makers.

As a premier supplier to Microsoft for two decades, our clients benefit from our extensive insights into the platform and engineering practices. Microsoft has awarded us seven specializations for meeting their highest standards of service delivery. Our clients improve their implementations with the breadth and depth of our expertise.

With globally integrated teams in Redmond, Mumbai, Hyderabad, and NOIDA, we deliver solutions with increased velocity and tech intensity. Our daily delivery and feedback model offers the flexibility to adapt solutions to changing business needs.

Expertise in Microsoft Fabric

At MAQ Software, our team of Fabric-certified experts excel in designing and deploying cutting-edge, cloud-native applications tailored to drive digital transformation. With deep architectural knowledge and a proven track record, we ensure seamless integration and optimal performance for all your Microsoft Fabric needs.

Certified expertise

Team of 1000+ Fabric-certified associates.

Deep architectural knowledge

In-depth understanding of Fabric's architecture and cloud-native design.

Proven track record

Successful digital transformations with Microsoft Fabric solutions.

Comprehensive solutions

End-to-end services for seamless Fabric-based application integration.

Microsoft Specializations

1. Analytics on Microsoft Azure
2. Data Warehouse Migration to Microsoft Azure
3. AI and Machine Learning on Microsoft Azure
4. Business Intelligence
5. Build and Modernize AI Apps
6. Migrate Enterprise Applications to Microsoft Azure
7. Kubernetes on Microsoft Azure
8. DevOps with GitHub on Microsoft Azure
9. Microsoft Low Code Application Development
10. Cloud Security
11. Threat Protection

Services offered

Industry-specific solutions

Our Microsoft Fabric solutions are tailored to various sectors' challenges and needs. Refer to our consulting services on Microsoft Azure Marketplace for more information.

Platform modernization

Harness Microsoft Fabric's capabilities with our experts. We analyze your tech environment, streamline implementation, and integrate Fabric seamlessly with your existing infrastructure.

Migration to Microsoft Fabric

Migrate smoothly to Microsoft Fabric with our skilled team. We simplify the migration and integrate Fabric efficiently for a successful transformation, paving the way for success.

Platform assessment

Evaluate the fit of Microsoft Fabric for your organization and platforms. Understand its suitability and benefits for your business with ease.

Real-time intelligence solutions

We provide real/near real-time intelligence solutions to our customers using Microsoft Fabric RTI capabilities.

Benefits of using Fabric

Scalability and flexibility

Microsoft Fabric offers unparalleled scalability and elasticity. Applications can scale vertically and horizontally, adapting to meet rising demands.

Availability

Microsoft Fabric is a robust foundation for applications. It ensures high availability, resilience, fault tolerance, and zero downtime during updates and maintenance.

Simplified development

Microsoft Fabric streamlines the development process. It fosters quicker time-to-market and shorter development cycles, improving efficiency.

Monitoring and diagnostics

Microsoft Fabric includes extensive monitoring and diagnostic tools. These enable proactive management and swift issue resolution, improving overall system health.
