marathon

Cloud Readiness Assessment - Azure

Quantitative and Qualitative analysis of existing data centre components (on-premise, hosted or other) and assessment of suitability/readiness for migration to Azure

Who is this for?

- New customers and existing customers with one or more of:
  - Ageing on-premise or hosted infrastructure
  - Equipment hosted in a data centre that will require change (end of contract, end of life, unsuitability)
  - Need to adapt to modern working/more agile infrastructure

Customer Benefits:

Through this assessment you will gain

- A quick-view of your estate
- An assessment of your cloud readiness
- An idea of scale required in terms of migration considerations, infrastructure renewal
- A snapshot of potential pricing models for cloud adoption

Deliverables:

Outputs from Azure Migrate tool analysis

- Quantitative view of potential cloud estate
- Documented report outlining metrics and sample costings for:
  - Azure IaaS components
  - Azure PaaS components
  - Azure networking components
  - Azure security components
  - Connectivity for users and on-premise systems
  - High-level sample migration roadmap approaches

Timescale:

Appropriate for all business, for small business may be "full migration option", for larger business may be partial or tactical

- 5 day engagement:
  - 2 day analysis
  - 2.5 days report writing
  - 0.5 days presentation of findings and next steps

Can be scaled up or down according to specifics (e.g. "technical" only rather than also being business oriented)

Cost £3,950
