

Create unlimited live position lists.
Search and find a vessel or a group of vessels by combining their technical dimensions, live and historical AIS data.

The screenshot displays the SHIPINTEL web application interface. At the top left, the logo reads "SHIPINTEL BY MARITIME OPTIMA". A search bar is present with the text "Search for vessels by name, MMSI, IMO and ports by LOCODE or name". Below this is a table of search results. To the right of the table are filter panels for "Route destination", "Via port (Optional)", "Visit duration", and "Via port applies to vessels". On the far right, a "Live search" panel is open, showing filters for "Departed from", "Last departure", "Operation", "Departure time", and "Current location".

Name	Last port	Via port	ETA
ATLANTIC DRAGON	Ponta da Madeira 09 Jul 14:03	Qingdao 29 Aug - 31 Aug	31 Aug 01:16
CRASSIER	Tubarão 07 Jul 23:46	Qingdao 17 Aug - 18 Aug	18 Aug 20:22
FPMC B JUSTICE	Itaguaí 15 Jul 10:29	Qingdao 25 Aug - 26 Aug	26 Aug 22:21
HANNA OLDENDORFF	Itaguaí 07 Jul 01:16	Qingdao 17 Aug - 18 Aug	18 Aug 23:59
LEOPOLD OLDENDORFF	Itaguaí 08 Jul 13:16	Qingdao 19 Aug - 21 Aug	21 Aug 05:01

Departed from: [X]

Last departure: [Port] [Area] East Coast South America [X]

Operation: Load

Departure time: Start date → End date

Current location: South Atlantic [X]

Route vessels

Find optimal ECA sea routes, shortest sea routes, and alternative sea routes, so you can compare the distance and ETA and the calculated carbon emissions.

The screenshot displays a maritime route planning application. The main map shows a route from Rotterdam, Netherlands, to ONISILOS, with a highlighted path through the Suez Canal. The map is overlaid with various colored regions representing ECA (Emission Control Area) zones. A sidebar on the left provides route details for an 'Unsaved route'.

Unsaved route | Get started

- ONISILOS
- Rotterdam
- Add destination

ONISILOS

Duration	15 days 8 hours
Distance	5,651 nm
Speed	15.70 kts
Main consumption	1,005 MT (main)
Aux. consumption	37 MT (aux)
Carbon emissions	3,246 MT (CO2)

Sea route details | Options | Carbon emissions | Current voyage

Carbon emissions

Outside of (S)ECA	4,048 nm
Fuel (main)	LSFO 380
Fuel (aux.)	LSFO 380
Main emissions	938 MT (CO2)
Aux. emissions	94 MT (CO2)
Total emissions	1,032 MT (CO2)

Options

Route via:

- Suez Canal (shortest)
- Avoid all constraints

Avoid ice (if possible) ⓘ

Minimize ECA distance

Create a workspace and add cargoes, run pre-voyage calculations, and compare the TCE / freight rates for numerous vessels and cargoes in seconds.

The screenshot displays a software interface for managing shipping operations. The main view shows a table with columns for Vessels, Cargoes, and various metrics like freight rate, days, and intake. A context menu is open over the table, showing options like 'Edit TCE target', 'Edit employment', and 'Remove cargo'. There are also blue callout boxes for '+ Add cargo' and '+ Add vessel'.

Vessels	Cargoes	Freight rate	Days	Intake
BULK SANTIAGO 207,992mt 18.40m Rotterdam, Netherlands at 22nd Apr 24	Emirates Global AI (EGS): 200,000MT bauxite	14.73 \$/MT	66.8	205,492 MT
