Core Capabilities

- Inventory stock tracking and stock counts
- Menu management of portions, recipes and production costs
- COGS, profitability & price change reporting
- Supplier management, purchase ordering .and automated re-ordering
- Accounting integration with Sage, Xero and QuickBooks Online, PO invoice capture, .data extractions and credit notes

POS Integrations

As the POS only offers basic inventory management, MarketMan is a great resource and value-add to expand functionality and save money.

MarketMan offers ingredient level tracking, commissary and warehouse management, production planning, as well as invoice scanning and vendor integrations.

Requested primarily by fine dining restaurants and multi-location venues.

An Integrated Ecosystem

MarketMan is available in the app marketplace. With a one time sign-in, all menu and sales data flow into MarketMan!

- Cut over-ordering, never have an eighty-six
- Recipe Costing: plan and budget your menu
- Shelf to sheet inventory counts with a mobile app
- Scan your bills using a mobile app

Manage More, Faster

- Save time. Save money. Increase organization.
- Reduce food costs by 5%
- Consolidate Inventory, POS, and supply chain
- Seamless integration with POS, Vendors and Accounting software
- Live updates on menu item profitability and inventory item reorder points sent straight to your phone.
