

Microsoft Copilot Studio for Government

Engagement Highlights

Gain visibility to data and content from non-Microsoft solutions

Combat budget and time constraints with our experienced engineers

Establish innovative, AI solutions using Microsoft 365 Copilot, infrastructure

Increase your enterprise's prompting mastery using MDS' business case modules

Leverage existing Python financial packages or international sanctions programs and APIs

Our MDS experienced Microsoft 365 Application Engineers, System Administrators, Business Analysts, Change Management Architects and Data Scientists comprise a group to help your organization advance your Copilot ambitions.

Approach

From local municipalities to state administrators to federal authorities - government agencies are taking bold action to use AI to modernize processes and reduce inefficiencies while ensuring its effective and appropriate use.

The Maureen Data Systems' Copilot Studio for Government delivery will build Microsoft 365 Copilot first-party, enhancements that increase the productivity of users from across the government spectrum, as well as the people they serve.

With our guidance

Innovate enterprise-relevant conversations for predictable scenarios that require specific responses, such as those for compliance or regulatory topics.

Leverage the Microsoft 365 Copilot infrastructure and foundation model to classify content, automate day-to-day operational processes and generate reports using simple natural language commands.

Why MDS ?

A Microsoft designated Data & AI, Modern Work and Security partner with an over 30-year, proven track record of delivering solutions and services.

Microsoft 365 Copilot Jumpstart Program Member

See Real World Value

Whether you have just started your enterprise generative AI journey or are further ahead, adopting a transformative solution platform requires planning, vision, risk analysis and many other critical considerations to enterprise line of business systems, productivity utilities and relevant business processes.

Our experienced team of Microsoft 365 applications engineers will help you realize actionable Copilot advances for your enterprise day to day use.

Engagement Goals

Empower your enterprise with AI productivity and skilling. Ready crucial content processes and sources for optimal Copilot experiences.

Note: Microsoft 365 Copilot Studio for Government engagement may have funding available for eligible customers. Please contact MDS to validate eligibility.

What to expect

Our MDS Four-Week Copilot Studio for Government engagement is a hands-on, intensive Microsoft 365 Copilot, first-party extensibility effort.

This includes four milestones across a full, MDS end-to-end Microsoft 365 Copilot delivery to enhance your organization's Copilot experience using Microsoft's Copilot Studio.

At engagement's end, MDS will have led your business stakeholders to validate your Copilot data or service integration business case.

What You Get

Assess your Microsoft 365 Copilot land scape and alignment then establish a cadence to deliver this engagement.

Enable your key organizational personas to leverage Copilot for the way you do business and utilize for day-to-day tasks and activities.

Establish a deployment and adoption strategy that fits your enterprise and tune your new AI powered practices to your own operations.

Validate functional, technical or role-based business scenarios to ensure enterprise success for Copilot user enablement !
