ISO 27001 Gap Analysis & Pre-Audit readiness & certification

Get ready for your ISO 27001 Audit with our comprehensive Pre-Audit Assessment!

Ensure your ISMS meets ISO 27001 standards and confidently prepare for external audits

Engagement Highlights

Identify any gaps in the ISMS against ISO 27001 standards

Document findings and provide actionable recommendations for improvement and remediation

- ISO 27001 is an international standard developed to provide a model for establishing, implementing, operating, monitoring, reviewing, maintaining and improving an Information Security Management System (ISMS)
- ISMS is a systemic approach to managing sensitive company information so that it remains secure. It includes people, process and IT systems by risk management process.
- ISO 27001 enables organization's business and digital transformation by reducing risk data security and privacy as well as establishing credibility among customers and business partners.
- Prior to an external ISO 27001 certification audit, organizations typically perform an assessment to ensure they are well-prepared. Our assessment identifies any gaps or weaknesses in your organization's information security practices, enabling you to take corrective actions before the formal audit.

Benefits of our ISO 27001 Gap Analysis & Pre-Audit Readiness & Certification

- Enhanced Security: strengthens your information security with Microsoft 365 integration
- Microsoft 365 Alignment: Aligns your ISMS with Microsoft 365 security and compliance features

MDS Approach

MDS will perform an ISO 27001 preaudit assessment to identify areas of weakness per ISO/IEC 27001:13/15 and ISO 27002:2022 that need to be remediated prior to ISO 27001 official certification.

MDS will follow ISO/IEC 27001:2013 and 27002:2022 standards

- Phase 1: Discovery and Planning.
- Phase 2: ISO 27001 ISMS Assessment and Gap Analysis
- Phase 3: Recommendations and remediation
- Phase 4: Remediation Work (T&M)
- Phase 5: Pre-Certification and Audit Readiness

Who should attend?

This engagement is ideal for organizations of all sizes and industries that are seeking to enhance their information security management and achieve ISO 27001 certification.

Why should you attend?

Achieving ISO 27001 certification demonstrates your commitment to information security, builds trust with customers and partners, and provides a competitive edge in the market.

What to expect?

- The organization's ISMS undergoes a comprehensive assessment against ISO 27001 standards
- Any gaps and areas of non-compliance are identified and addressed
- A detailed report with recommendations for improvement is provided
- The organization is well prepared to confidently undertake the external ISO 27001 audit

Why MDS?

Maureen Data Systems (MDS) is a leading solutions and professional services partner for world-class technology companies that empower companies to achieve digital transformation using the latest **cloud, AI**, and **security** technologies.

- Proven expertise in customizing and implementing Microsoft technologies
- Offers comprehensive and dependable cloud, AI, and security services
- Numerous Microsoft technical specializations, certifications, and awards
- All-encompassing vendor management, staff augmentation, licensing, and compliance services
- Industry leading 365/24/7 technical and customer service support
