

## Security Copilot Workshop

Discover how Microsoft Security Copilot can enhance your security operations, streamline incident response, and empower your security teams

### Unlock the potential of AI for Security

Join us for this 2-day workshop and learn how Microsoft Security Copilot, an innovative cybersecurity AI solution can help your organization navigate security operations with speed and confidence..

### Workshop Highlights

- **Overview of Security Copilot:** What is Security Copilot, how does it work, and what are the benefits of using it for security professionals?
- Review **prerequisites, licensing, and technical requirements** for deploying Security Copilot.
- Conduct an **envisioning session**: see Security Copilot in action and explore its features and capabilities.
- **Integration of Security Copilot with Microsoft Security Products:** learn how Security Copilot works with Microsoft 365 Defender, Microsoft Sentinel, Microsoft Intune, and other Microsoft security solutions.
- **Customization and Extensibility:** learn how to customize Security Copilot to fit your specific needs, and how to extend its functionality with APIs and third-party integrations.
- **Best Practices and Tips:** Learn how to get the most out of Security Copilot, how to troubleshoot common issues, and how to provide feedback and suggestions for improvement.
- **Review common security scenarios and identify high value use cases** within your organization that can benefit from Security Copilot.
- **Build a plan** tailored to your specific needs with recommendations and next steps.

# MDS Security Copilot Workshop

## Benefits

- Helps security teams fight an asymmetric battle against well-resourced, organized, and sophisticated attackers.
- Addresses the global shortage of skilled security professionals.
- Seamlessly integrates with Microsoft Security products such as Defender, Sentinel, and Intune, enhancing them with a unique set of use cases and capabilities that make security tasks drastically more accessible along with third-party SIEM and ticketing system integration.

## Why Attend?

- Stay ahead! Discover cutting-edge AI driven security practices
- Boost Efficiency: learn how Security Copilot streamlines security workflows
- Outpace adversaries and enable response in minutes!
- Practical insights: gain actionable insights to enhance your security operations
- Strengthen team expertise with generative AI

## Who should attend?

- CISOs
- Security Operations Center (SOC) Analysis
- IT Administrators / IT Professionals
- Data Security Administrators / Security Admins
- Security Analysts, Managers and Directors
- Incident Responders

## ▶ Approach

Our workshop is an interactive engagement aimed at learning what Copilot for Security is and how it can help your organization be more efficient, productive, and accelerate expertise and skills.

### Discovery

Scoping, readiness & current state assessment  
Define scope, identify business stakeholders & gather information on key business scenarios & use cases

### Envisioning

See Security Copilot in action, learn how to use it for various security scenarios, and explore its features and capabilities

### Persona & Scenario

### Evaluation

Identify the personas, key stakeholders, and high value use cases, and select Security Copilot scenarios best suited for your organization

### Build the Plan

Deliver a prioritized, actionable plan for adoption and implementing Security Copilot
