# Cybersecurity Assessment

Learn how to put next-generation Microsoft Security tools to work for you.

## Engagement highlights

- Identify a baseline of your organization's cybersecurity policies

- Use Microsoft Security capabilities to generate an overview of areas of focus

- Map baseline and security scan results to common threat scenarios

- Develop joint plans and next steps

**Human-operated ransomware and insider data leaks are major security risks for organizations. Over 98% of these attacks can be prevented with basic security hygiene. How aware is your organization of the policies and activities that can strengthen your cybersecurity posture?**

## Improve your security awareness with a Cybersecurity Assessment

Organizations are addressing security threats from various locations and working with multiple stakeholders to comply with industry and regional regulations. Improve your security posture with Microsoft Security solutions by scheduling a Cybersecurity Assessment with Maureen Data Systems (MDS).

We can help you develop a customized strategic plan based on recommendations from Microsoft and MDS experts. Gain awareness of your current security state, aligned to industry benchmarks, and get support on remediating vulnerabilities and upgrading your security posture for the long term.

## Why you should attend

This assessment helps you understand the importance of security and protect your organization from threats. We will discuss the latest security threats so your organization can stay ahead. By attending, you can:

- » Engage in hands-on activities to help you gain an understanding of common threat scenarios

- » Walk away with actionable next steps grounded in industry accepted benchmarks

- » Get a documented status of organizational defenses against common threats

- » Better understand how to accelerate your security journey using the latest Microsoft Security tools

## What to expect

During this assessment, we'll partner with you to strengthen your organization's approach to cybersecurity. We'll help you better understand how to prioritize and mitigate potential attacks, with:
- Insights into common cybersecurity threats and the impact they can have on business operations.

- Analysis of your organization's alignment to common cybersecurity goals and improvement actions designed to help strengthen your posture against human operated ransomware and data leaks from insider threats.

- Visibility into to your endpoint health and Microsoft 365 data using scans from Microsoft Security tools.

- Long-term recommendations from Maureen Data Systems experts about your security strategy, with key initiatives and tactical next steps.
