Forvis Mazars Now!

Integration Insights

Streamline system interfaces and insights with Integration Insights.

Scaling Transformation

Accelerate your time to market. Seamlessly integrate your Microsoft Dynamics 365 ERP system with other critical business systems while improving flexibility and scalability.

Unburden your team from manually monitoring disparate systems and gain operational insights with a modern web portal designed to monitor enterprise health, KPIs, and other key metrics.

Dynamics 365 Integration Insights

With Forvis Mazars Now! Integration Insights, you can quickly integrate traditional interface flows along with operational visibility to monitor your enterprise landscape quickly and easily.

The robust integration middleware, built on Azure PaaS, offers monitoring and troubleshooting capabilities through a web-based portal, including a prebuilt connector to Dynamics 365 Finance and Supply Chain Management for validation error correction and seamless integration.

Key Benefits

- **Streamlined Integration Process**: Simplify integration across systems and applications, reducing complexity.

- **Improved Data Quality**: Promote data consistency and reliability across platforms for better decision making.

- **Cost Reduction**: Reduce the total cost of ownership with a solution that leverages modern technologies and includes a prebuilt connector to Dynamics 365.

- **Extensibility**: Our standardized approach to building interfaces accelerates time-to-market, enabling scalable business growth.

- **Compliance**: Gain powerful insights to identify variances and anomalies, improving third-party compliance and reducing rework.

Business Applications

forvis mazars

Why Dynamics 365?

Modern applications

Modern applications that deliver new experiences and connect with a business' existing systems to allow organizations to digitally transform their way. Applications that use mixed reality, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices, and micro-applications to drive intelligence and inform a more effective business process.

Unified data and processes

Unified data and processes that enable business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data to a single network.

Intelligence that delivers

Intelligence that delivers actionable insight. Data in the new world includes social, relationship, and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

An extensible environment

An extensible environment that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.

Microsoft Dynamics 365

Transform on your terms with Microsoft Business Applications. Enable people to do their best work. Gain actionable insights. Thrive with solutions expressly built for change. Unlock next.

Key use cases

Sales
Respond to changing business requirements with a flexible platform to rapidly create new solutions and ensure old solutions are never truly finished.

Service
Understand your customers better and respond more quickly by accessing internal and external relationship data.

Finance and operations
Increase your return on investment with Microsoft's agile and efficient cloud solution.

Talent
Extend your virtual team and coordinate faster with a consolidated view of team members, activities, and responsibilities.

Marketing
Gain end-to-end visibility by connecting data from external markets, social, and legacy sources.
