

Forvis Mazars Now! Procurement

Explore Microsoft Dynamics 365 Supply Chain Management procurement capabilities

Rapid deployment

Forvis Mazars Now! Procurement offers an eight to 10-week implementation leveraging Microsoft Dynamics 365 Supply Chain Management.

This pre-configured solution combines industry-leading technology and best practices to drive value across the organization and consolidate purchasing power while reducing managed spend with rapid deployment.

This cloud-based solution uses Microsoft Azure and has a mobile app that works with Apple, Android, and Microsoft Teams.

The application also can enable punch outs to external vendor catalogs like CDW and Office Depot, streamlining the sourcing experience.

Overcome procurement obstacles

Procurement management is often filled with challenges and difficulties. Gaps in information, line item details, and purchasing history has led to the inability to effectively order, manage, and account for purchases.

Key benefits

Forvis Mazars Now! Procurement rapid deployment can help you modernize your supply chain by:

- Driving process control
- Increasing organizational efficiencies by consolidating bulk purchases and reducing costs
- Streamlining procurement and fulfillment
- Adding visibility and accessibility across departments and regions using intelligent workflows and process automation
- Utilizing fixed price, scope, and timeline

Add compliance and control to your supply chain

This solution can help you uncover planned purchase risks with data about past supplier performance and product metrics—in one centralized workspace. It also can help you quickly onboard vendors and collaborate across procurement processes with a single, secure application. In addition, teams across the organization can attain a unified view into the ordering system, distribution of vendors, and discounts on bulk orders.

Key features

Forvis Mazars Now! Procurement provides these key features:

Procurement policies

Uncover the most advantageous balance of price, quality, and performance

Vendor management

Select vendors, negotiate contracts, control costs, reduce vendor-related risks, and improve service delivery

Procurement catalogs and pricing

Reduce friction with more information upfront

Requisitions and sourcing

Assign a source of supply to a submitted requisition

Purchasing

Ordering, expediting, receiving, and fulfilling payment

Vendor collaboration

Grant access to your vendors to review, accept, or deny requests

Purchase analytics

Measure purchase order cycles, improve payment terms, review payment accuracy, discover rebate opportunities, identify mistaken payment, and mitigate fraud

Why Forvis Mazars

The Microsoft practice at Forvis Mazars provides end-to-end technology solutions covering all three Microsoft cloud solutions: Azure, modern workplace, and business applications. Our focus areas include Microsoft Dynamics 365, Power Platform, analytics, IT infrastructure and automation using robotic process automation (RPA). The goal? Helping our clients achieve their desired business outcomes.
