

# CONNECTED BLUEPRINT™

A Connected Blueprint™ uncovers opportunities and provides a practical approach to modernize your business. Designed for manufactures, Connected Blueprint™ provides tailored recommendations and a phased execution plan that delivers tangible value at regular intervals and improves your P&L and Balance Sheet.

Quickly uncover broken links in your processes and opportunities to drive efficiencies in just 4-6 weeks.

## Step 1 Assess

During this discovery phase, Gemba Walk with our subject matter experts to identify strengths and opportunities. We'll compile and analyze data to create a structured path and have targeted meetings to create tailored, innovative solutions with tangible impact at regular intervals.

## Step 2 Prioritize

Using the assessment findings, our industry experts help you prioritize opportunities on a Kaizen PICK chart based on level of effort vs. impact in a focused workshop setting.

Create More  
Resilient Supply Chain

Increase Manufacturing  
Productivity

Build a More  
Agile Factory

Automate  
Business Processes

## Step 3 Act

We position you to act on the opportunities identified via a phased approach, a blueprint specific to your organization. And we'll get you off to a fast start with a prototype solution for one priority use case.

## What You Get with

CONNECTED  
BLUEPRINT™

- ✓ Prioritized improvement opportunities and Kaizen PICK chart
- ✓ Phased execution plan and financial model tied to P&L and Balance Sheet
- ✓ Prototype solution for one priority use case

## Prioritized Kaizen PICK Chart

Use the Connected Blueprint™ framework to prioritize improvements across your business or focus on a targeted area such as:

- Intelligent Demand Forecast and Integrated Planning
- Supply Chain Visibility and Risk Management
- Inventory Optimization, Intelligent Procurement, and Order Management
- Overall Equipment Effectiveness, Asset Downtime, and Predictive Maintenance
- Sustainable Operations and Quality Management
- After Market Parts Management and Warranty Claims
- Field Service: Scheduling and Dispatch, Technician Success, Proactive and Predictive Transformation
- Optimized Financial and Service Centric Models
- Low Code Innovation
- Personalize Customer Experience

The cost for this engagement is estimated and may change based on the final scope of work included.
