We Can Manage your App for you.

The Hossted team's deep experience in the open source world enables us to take care of your open source application on the cloud marketplace.

We will:

- Ensure the application is installed correctly
- Address any issues with usage or procedures
- Secure the Access Layer
- Address any security vulnerabilities
- Monitor the running instance
- Provide upgrades to the software

You will:

Never again have to navigate the challenges and complexities of open source software alone.

Contact us on Hossted.com to find out more.
