CompuGroup Medical Polska Sp. z o.o.

![mediguard telemedycyna]

Multifunctional Mediguard system allows multilateral communication and transmission of the test results and all kinds of data from portable diagnostic devices or sensors while the Azure cloud allows safe and reliable storage of collected data.

Proofs and Statistics

- Development of the Mediguard system – over 5 000 users
- Nearly doubled the amount of conducted medical tests during the last year
- 60% increase of the income in the current year

Proof and statistics for the shared solution

- Cooperation development
- 100% trust for Azure cloud solution among possible contractors
- Three times as wide interest in Microsoft-supported services

The offer of Mediguard system includes delivering of the system for data storage and analysis, app for transferring the test results and devices from which the data is collected.
System access and app usage is offered in SaaS model (about 4000 PLN) or by one-time fee determined by the duration of the signed agreement. The offer on equipment depends on agreements with the suppliers or device producers.

Direct communication and data transfer

PATIENTS/USERS — Sensors, diagnostic devices and others — Mobile app — Telemedicine platform — Azure Cloud

mediguard telemedycyna

Tangible benefits

- Continuing cooperation in respect to maintaining the service for Medical University of Lodz, where stored data for further analysis is widely used.

- Establishing cooperation with the Pomeranian University in Slupsk where due to the flexibility and safety of the cloud platform any data obtained during the project realization will be safely stored.

- Thanks to the Microsoft's solution we are able to offer our smaller recipients seperate servers where their data will be safe and segregated from other Client's data.

Why Mediguard?

Mediguard is an innovative and modern company which offers comprehensive solution as medical integrator. Mediguard platform's openness allows full flexibility by adjusting solutions for demands or needs of an individual medical facility, corporation or business partner. Neutral system environment allows connecting any data source and open construction of the Mediguard system allows its development by adding new features in accordance with individual needs.
