Patient and Doctor Web Portal

# medportal

## Patient and Doctor Web Portal

### All results in a single WEB portal

Radiology studies and reports in one place

### Access for Patients and Doctors

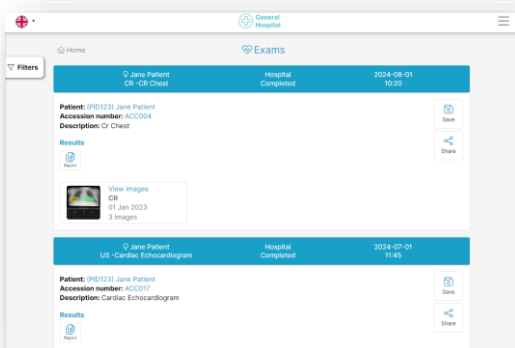

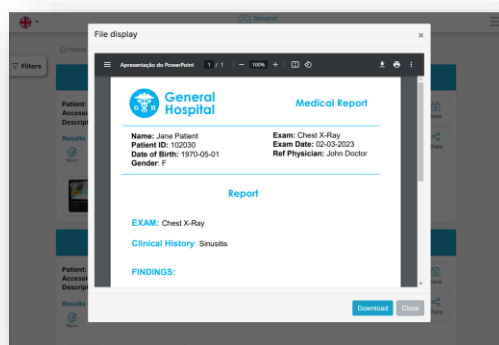

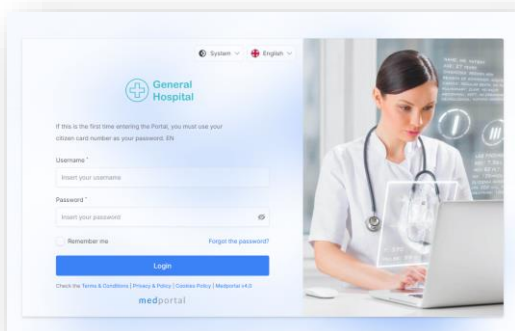

Allow your Patients and Doctors to access there results whenever and wherever they want

### Share results

Patients and Doctors can share their exams through email, SMS or others

### Notifications

Notify patients and doctors when new results and/or reports are available with a customized layout

## Features

### 1 - Viewer Zero Footprint

View Radiology and Non-Radiology images in a Zero-footprint Dicom viewer in any PC or mobile device

### 2 - View PDF Report

Access Exam Report in PDF format. Possibility to view, print, download and share

### 3 - Dicom Download

Download the original DICOM images to a local folder or Pen-Drive with a simple viewer that can be opened in any Windows PC

### 4 - Exam Share with Ref Doctor

Share images and reports with external Doctors in a secure way. User can define the number of days the share will be active

**MEDPORTAL Patient and Doctor Web Portal** centralizes all exams and reports from different Hospitals, allowing Patients and Doctors to have access to exams anytime, anywhere, from any mobile device.

**CLOUD or On-Premise:** Can be installed in CLOUD or Customer Datacenter

**Multi Language Support:** and possible local customization

System

English

**General Hospital**

If this is the first time entering the Portal, you must use your citizen card number as your password. EN

 Medportal v4.0

medportal

## Your Branding

Customize logos, images, colors and wording of your own **medportal** to match your branding. Use your own domain or one provided by us

## No PACS? No Problem

By scheduling exams directly in medportal or on your HIS/RIS medportal can create DICOM Worklist and store images created on your DICOM equipment

## No RIS? No Problem

Create patients and exams manually to keep your history consistent

## Free your receptionist from CD delivery

By sending the results online to Patients and Doctors remove the cost and work of delivering CDs

## Customer APP Integration

If you already have a website or APP you can integrate with medportal through secure API to access results (images/results etc...)

## QRCode

**One Scan away.** Mepdortal can generate **QRCode** to deliver to patients/doctors all the results

## OAuth Integration

Access medportal with your existing credentials using OAuth 2.0

## Security

Enforce multiple factor authentication, password change, and user registration however you like

## AI Integration

Integrate third party AI algorithms in the exams you want whenever you want

## PACS, VNA, RIS, HIS

Medportal can use DICOM (Query Retrieve or WADO) to integrate with PACS and or VNA and HL7 for RIS, HIS and VNA

## CLOUD or On-Premise

Medportal can be installed in your existing infrastructure or managed by us in our CLOUD
