# Reduce the cost and complexity of IoT development

The meldCX platform makes it fast, simple and cost-effective to develop, deploy and manage commercial apps on IoT devices, enabling you to accelerate and scale your business. With meldCX, you can rapidly create, seamlessly control and easily commercialize native applications for complex endpoint use cases. Plus, a variety of solution modules allow you to create new services and capabilities at any time, and rebrand them as your own products.

meld CX ™

The meldCX IoT platform makes the Internet of Things more accessible and easier to implement and use, enabling you to build commercial apps that are secure, robust, interoperable, a breeze to manage, and require only a fraction of traditional development time.

### Rapid innovation
Build secure, robust applications in less time, and focus on development that adds value.

### Easier to manage & scale
Experience fast, fail-safe deployment, ongoing zero-touch maintenance, and easier upgrades and scalability

### Faster time to market
Grow your business more quickly, more easily, and more profitably

## Exceeding expectations
"meldCX has helped us accelerate how we reach our clients, and how we can deliver a service that will meet and exceed their needs."
— **David O'Rourke**, CEO | Nightlife Music

## Accelerating development
"Developing on meldCX has been an absolute godsend as far as time savings is concerned. We didn't have to reinvent the wheel. It saved us months and months of additional development work."
— **Matt Trigwell**, Founder | Respond 52

## About meldCX
meldCX is an affiliated company within the ACER and AOPEN groups—world leaders in hardware, electronics, and cloud-based technologies. meldCX, the company's flagship product, is filling a gap in the technology market by providing a web-based application programming interface (API) that is revolutionizing how businesses think about, develop, and deploy apps for commercial devices such as digital signs, POS units, and self-service kiosks.
