

GET STARTED WITH WINDOWS VIRTUAL DESKTOP

Working in a Cloud hosted desktop may feel like a risky move for many companies – but the reality is far from it. **It actually offers a whole new layer of security and protection for sensitive, personally identifiable, and financial data, without driving up costs or getting in the way of productivity.**

With Windows Virtual Desktop managed by Meritum Cloud, you can move all your applications and data away from vulnerable physical desktops. There's no risk of theft, your data can't be lost along with a misplaced laptop, and your organization benefits from the reliability of the Azure cloud.

Secure, flexible, scalable end-user computing delivered in Azure

Windows Virtual Desktop (WVD) is the ideal way to enable productive remote work, enable protected access via different types of devices, and also simplify the backend management process. Plus, you get the added bonus of working in Microsoft Azure, one of the market's most secure, high-performance public clouds.

Microsoft
Partner

- Gold Cloud Platform
- Gold Datacenter
- Silver Security
- Silver Cloud Productivity
- Silver Small and Midmarket Cloud Solutions

Did you know?

Microsoft invests over \$1 billion in its cybersecurity every year – so you can rest assured that the services that protect your data and infrastructure are constantly updating and improving.

5 benefits of Windows Virtual Desktop

- **Preferred platforms**

Connect using your favorite device, whether it's running Windows, macOS, Android, or even Linux – ideal for remote working or bring-your-own-device strategies.

- **Familiar systems**

Get the same user-friendly Windows experience as a traditional desktop, without worrying about updates or hardware upgrades.

- **Native integration**

Use all your Office 365 applications, OneDrive, Microsoft Teams, and more with no disruptions – plus all your business applications.

- **Rapid deployment**

Onboard new users in under an hour, with no time or CapEx wasted on acquiring and setting up new hardware.

- **Flexible costs**

Reduce your OpEx costs and only pay for the resources you use by using Windows 10 multi-sessions and scaling up and down to match demand.

Secure by design

- Over 90 compliance certifications, including ISO 27001, 27018 and 27701
- Active Directory and role-based access as well as multi-factor authentication
- Easy compliance with GDPR, Sarbanes-Oxley, and other industry regulations
- A full range of security features in Azure, such as Microsoft Security ATP
- Proactive threat detection and automated security responses
- The ability to use your own security tools and internal policies

Meritum Cloud: A lean partner with high impact

We believe that modern IT means business. Driven by our passion for technology we help companies gain competitive advantage and increase profitability.

With our Cloud expertise and customer-centric approach we guide our clients through a complex world of Microsoft and Citrix technology.

As a trusted technology partner, we design and engineer IT infrastructure and provide end user technology adoption and support services so that you can solely focus on your business.

With offices in London and Krakow – we operate a hybrid resourcing model, offering you world class services at competitive rates. Being a customer success focused modern MSP, we cut down on red tape and deliver rapid results.
