Microsoft Power Apps Consulting Services
- Empowering Citizen Developers -

MERP Systems (MERP) is offering a business applications and forms modernization strategy and consulting services that utilizes the rich and innovative constructs of the Microsoft Power Apps platform.

MERP is a GOLD certified Microsoft Partner. MERP, a business modernization and digital transformation consulting services powerhouse has developed a center of excellence that provides Federal, State & Local, and nonprofit customers a transformation strategy of systems and applications that leverages the strengths of Microsoft Power Apps. MERP, a certified 8(a) and woman-owned small business has created repeatable, modular, and efficient models that can assist both technically astute and citizen coders alike in designing, developing, and managing the business applications using this low-code, no-code platform.

Deliverables

This offer is to help customers:

- To develop a technical strategy to rationalize applications management strategy
- Inform and enable the business users about the possibilities of the Power Apps platform
- Through a well-orchestrated discovery process, help envision the modernization trajectory
- Roadmap the transition highlighting the capabilities of Power BI, Power Apps, Power Automate, and Power Virtual Agents
- Model the applications into Model View and Canvas driven based on complexity and customer need
- Develop an environment strategy to configure environments and other layers of data security
- Using Dataverse, orchestrate a data layer that can scale and extend
