

Meter is the first and only networking solution Azure customers can consume through MACC.

# A unified network platform from ISP to refresh

Meter designs, deploys, manages, and supports enterprise wired and wireless LAN and SD-WAN. Get Azure-optimized networks that easily scale to thousands of locations.

## Meter Hardware

Hardware designed and manufactured in-house.

**Power Distribution Units**  
6x 120V outlets

**Security Appliances**  
1G, 10G

**Switches**  
12, 24, 48-Port PoE+

**Access Points**  
Wi-Fi 6 802.11ax

## Meter Software

Visibility, security, and control from a single pane of glass—streamlining Azure-scale networking.

### Meter Command

Use natural language to get information about your networks, take action, and generate entire dashboards to fit your workflow.

Talk to your network

Create a VLAN for IoT devices and enable it.

"I can focus on other things that I need to be worrying about, knowing Meter has my back where internet infrastructure is concerned."

**James Kang**  
IT Manager

**Webb School**  
OF KNOXVILLE

"For a reasonable monthly charge, you get a team of network professionals available 24/7, dedicated to managing your internet infrastructure. That's Meter."

**James Kong**  
IT Manager

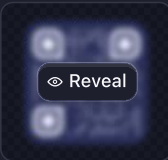

**STRAVA**

Meter is the first and only networking solution  
Azure customers can consume through  
MACC.

# Managing your network has never been this effortless

Experience an all-in-one solution with enterprise hardware, cloud-based software, and end-to-end operations to set up and scale your multi-site networks.

Create an SSID with the name Guest and enable for all APs on the network. Rotate password daily at 2AM.

 **Reveal**

Password Very strong

## Manage a network that works for you.

Meter's unified networks are designed to meet the demands of high-throughput Azure workloads—so your teams stay focused on innovation, not fire drills.

## One click. Update policies in bulk.

Push configuration updates—VLANs, SD-WAN policies, access controls—across every Azure-connected site instantly.

## Fix your network in record time.

Flash LEDs, cycle POE, read audit logs, adjust channel width, perform real-time cable tests, and more – all from your dashboard.

## An integrated, secure architecture.

Zero Trust baked in. With DNS filtering, encrypted tunnels, and next-gen firewall controls, Meter secures the full edge-to-cloud path for your Azure resources.

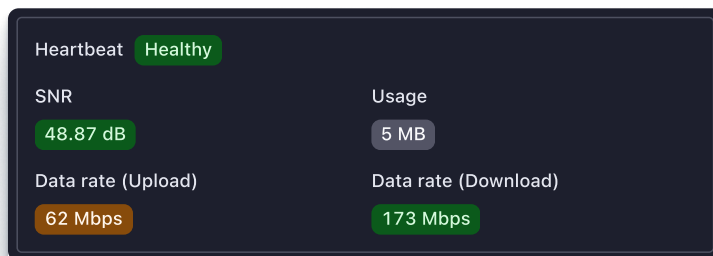

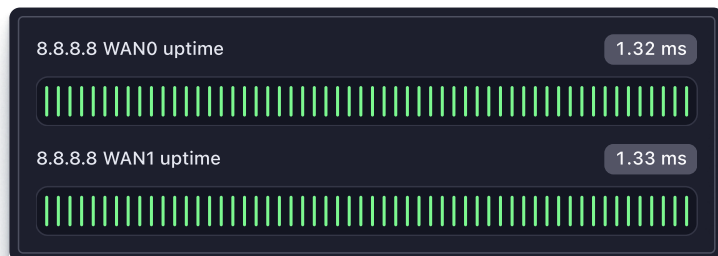

## As reliable as it is secure.

Designed with redundancy, MultiWAN, and HA built-in, Meter ensures resilience for critical Azure services, digital twins, and hybrid edge environments.

## Get 2-3x faster installations.

Networks installed in three stages: Planning, Deployment, and Management, culminating in lifecycle refresh, included at no additional cost.

## Get deep visibility into every facet.

Track every port, device, and configuration with full telemetry for faster troubleshooting across your Azure footprint.

## Proactive operational support.

Proactive network troubleshooting and 24/7 operations throughout all of your locations. Meter has your back at all times.
